

## About OPERS

OPERS was established in 1964 by the Oklahoma Legislature. Its mission is to provide and promote accountable and financially sound retirement programs for its members. As of June 30, 2007, OPERS consisted of 273 participating employers made up of state, county, and local agencies. The membership includes 44,712 active members, 5,637 inactive vested members and 25,233 retirees and beneficiaries.

## Changes in Plan Net Assets

OPERS is funded through a combination of member contributions, employer contributions and investment earnings. For fiscal year 2007 member and employer contributions increased primarily due to an increase in the salary base on which contributions were calculated and increased member and employer contribution rates. Net investment income increased primarily due to the appreciation in the fair value of the Plan's investments as a result of improvements in fixed income and equity markets.

Deductions to plan net assets are incurred primarily for the purpose for which OPERS was created, namely the payment of benefits to retirees. In fiscal year 2007, retirement, death and survivor benefits increased primarily due to the increase

in the number of retired members and a 4% cost of living adjustment to monthly benefits. Refunds and withdrawals increased as more participants withdrew their contributions on severance of service. Administrative expenses increased due to increases in technical services and staff salaries and related personnel expenses.

## Funding

A pension fund is well funded when it has enough money in reserve to meet all expected future obligations to participants. The funding objective for OPERS is to meet long-term benefit promises through contributions that remain approximately level as a percent of member payroll. The greater the level of funding, the larger the ratio of assets accumulated to the actuarial accrued liability and the greater the level of investment potential. The advantage of a well-funded plan is that the participants can look at the assets that are committed to the payment of benefits. The actuarial accrued liability and actuarial value of assets of OPERS as of July 1, 2007, amounted to \$8.4 billion and \$6.1 billion, respectively.

## Funded Ratio Chart

as of July 1

Although the funded status of OPERS has been steadily declining over the last several years, it moved ahead this year to 72.6 percent at July 1, 2007, from 71.4 percent the prior year. It was 90.7% at July 1, 1998. In 2003 the Legislature authorized a gradual increase of employer contributions to OPERS, scheduled to begin July 1, 2006. In 2004, this scheduled increase of 1.5% was moved to July 1, 2005, with the rate increasing 1% annually until 2011 when it reaches 16.5% for state agencies and 20.0% (combined employee/employer rate) for non-state agency employers.

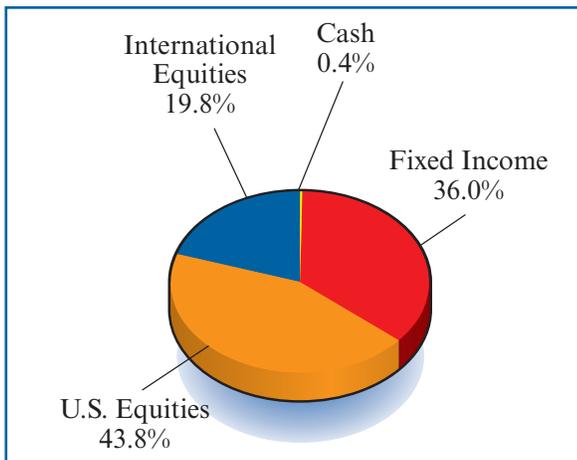

## Investments

The standard for OPERS in making investments is to exercise the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting

in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims. In addition, funds are to be diversified so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so. Funds of OPERS are invested solely in the interest of the membership and their beneficiaries, and defraying reasonable expenses of administrating OPERS. The Board of Trustees has established an investment policy and guidelines that identify asset allocation as the key determinant of return and diversification as the primary risk control element. Outside investment advisors are engaged to manage the investment portfolio. They execute the investment policy in accordance with the statutory authority, the Board policy and their respective guidelines, and may use full discretion within the policy and guidelines. At fiscal year end, the investment portfolio of OPERS was managed by 10 investment management firms. Investments provided a 16.4 percent rate of return. The annualized rate of return for OPERS over the last three years was 11.6 percent and 10.9 percent over the last five years, comparing favorably to the policy benchmark for each period.

At June 30, 2007, the allocation of the investment portfolio is shown in the chart below.
