

UNIFORM RETIREMENT SYSTEM FOR JUSTICES AND JUDGES

2015
A BRIGHT FUTURE STARTS HERE

Comprehensive Annual Financial Report for the Fiscal Years Ended June 30, 2015 and June 30, 2014
A Component Unit of the State of Oklahoma

A BRIGHT FUTURE STARTS HERE

The Uniform Retirement System for Justices and Judges (URSJJ) is committed to providing quality financial and retirement planning education early and often throughout our members' careers. Success in retirement is within reach for our members who dedicate themselves to the noble calling of public service.

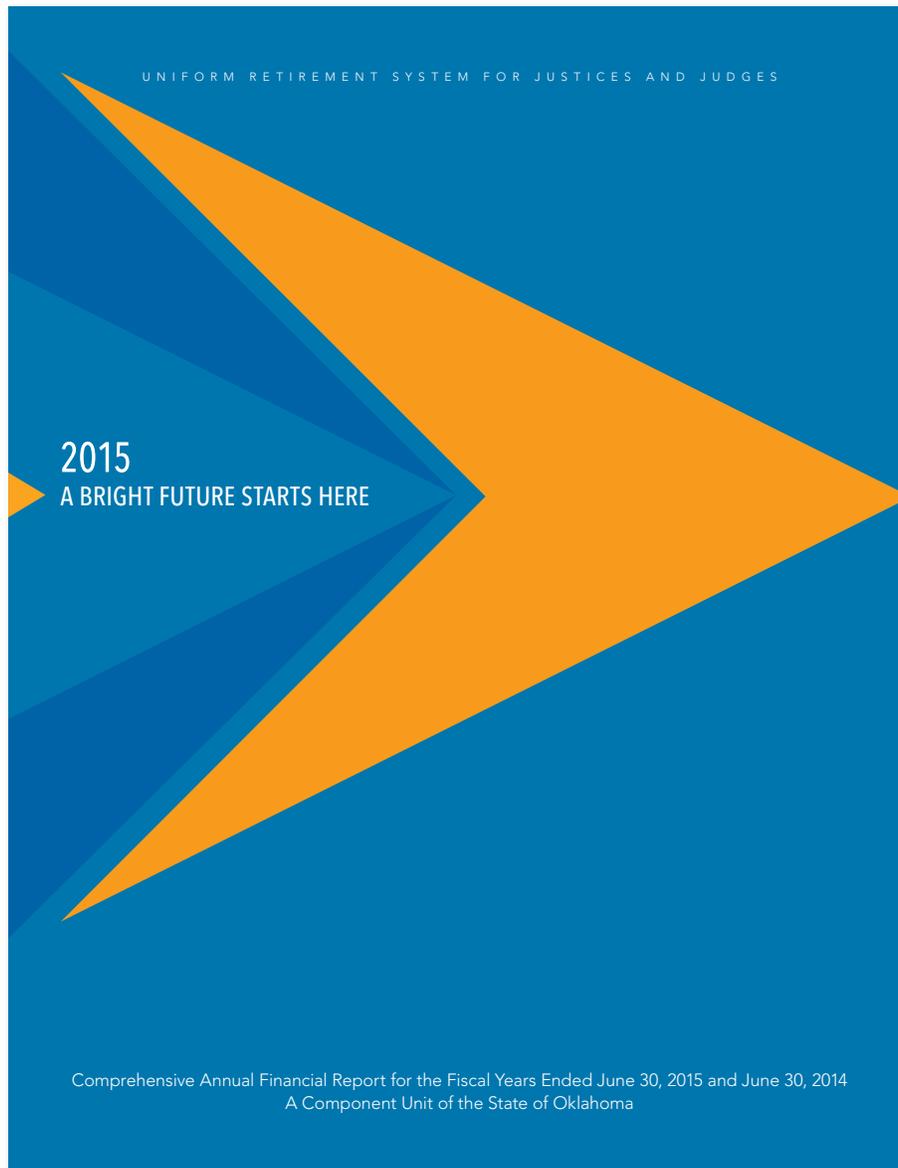

A bright future starts with good planning. This edition of the Comprehensive Annual Financial Report expands on some of the retirement planning concepts we convey to members as they plan for their future. Each section of this report highlights one of the following concepts:

- What does retirement readiness really mean
- Understanding the risks of retirement
- Setting well-defined financial and retirement goals
- Using the “four-legged” chair as a model
- Reducing debt

The URSJJ has taken an active role in helping our members be better prepared for retirement by providing comprehensive information throughout their careers. Being adequately prepared requires taking steps years, even decades, in advance. Ongoing retirement education is available to members in a number of ways, including financial planning seminars, the *Retiring Right* newsletter, member publications, online resources, and a friendly staff waiting to answer any question.

At the URSJJ, we strive to help our members on their journey to a financially secure retirement – a retirement that rewards the service provided to the citizens of our great state.

This report was prepared by the staff of the Uniform Retirement System for Justices and Judges.

This publication is issued by the Oklahoma Public Employees Retirement System as authorized by its Executive Director. Copies have not been printed but are available through the agency website. An electronic version of this publication has been deposited with the Publications Clearinghouse of the Oklahoma Department of Libraries.

Introductory Section

- 1 Letter of Transmittal
- 5 Chairman’s Letter
- 6 Board of Trustees
- 7 Organizational Structure
- 7 Advisors and Consultants
- 8 Certificate of Achievement for Excellence in Financial Reporting

Financial Section

- 9 Independent Auditors’ Report
- 11 Management’s Discussion and Analysis
- Financial Statements:**
- 17 Statements of Fiduciary Net Position
- 18 Statements of Changes in Fiduciary Net Position
- 19 Notes to Financial Statements
- Required Supplementary Information:**
- 32 Schedule of Changes in the Net Pension Liability (Asset)—Schedule 1
- 32 Schedule of the Net Pension Liability (Asset)—Schedule 1
- 33 Schedule of Employer Contributions—Schedule 2
- 34 Schedule of Investment Returns—Schedule 3
- Supplementary Information:**
- 35 Schedule of Investment Expenses—Schedule 4
- 36 Schedule of Administrative Expenses—Schedule 5
- 37 Schedule of Professional/Consultant Fees—Schedule 6

Investment Section

- 38 Investment Consultant’s Report
- 41 Chief Investment Officer’s Report
- 47 Largest Holdings
- 47 Schedule of Stock Brokerage Commissions Paid
- 48 Investment Portfolio by Type and Manager
- 49 Asset Comparison

Actuarial Section

- 50 2015 Certification of Actuarial Valuation
- 52 Summary of Results
- 53 Analysis of Financial Experience
- 54 Solvency Test
- 55 Schedule of Active Member Valuation Data
- 55 Schedule of Retirants, Disabled Retirants and Beneficiaries Added to and Removed from Rolls
- 56 Summary of System Provisions
- 58 Summary of Actuarial Assumptions and Methods

Statistical Section

- 60 Statistical Section Narrative Explanation
- 61 Schedule of Changes in Fiduciary Net Position
- 62 Schedule of Revenue by Source
- 62 Schedule of Expenses by Type
- 63 Schedule of Benefit Payments and Refunds by Type
- 63 Funded Ratio Chart
- 64 Rate of Return by Type of Investment
- 65 Schedule of Retired Members by Type of Benefit
- 66 Schedule of Average Benefit Payments
- 67 Principal Employer
- 67 Demographics Chart
- 68 Member Statistics
- 69 Distribution of Retirees and Beneficiaries
- 70 Summary of Active Members

WHAT DOES IT MEAN TO BE RETIREMENT READY?

Are you ready for retirement? Is it a simple matter of dollars and cents? When you think about readiness, are you thinking beyond the financial to include physical and emotional readiness? Everyone must evaluate their own readiness by whatever definition they think is best. There is no one-size-fits-all approach.

How financially ready are you for retirement? Assessing your income and expenses, and whether your retirement savings will support your lifestyle after you stop working is one part, but there are others.

Emotional readiness is also important, and you will go through several different emotional stages leading up to and into retirement. Varying degrees of anticipation, apprehension, euphoria and a sense of normalcy are common to everyone as they retire. Retirement can last for decades and your emotional state will change, so make sure to have those new routines that will replace the purpose and relationships lost when no longer working.

November 30, 2015

To the Board of Trustees of the Oklahoma Public Employees Retirement System
and Members of the Uniform Retirement System for Justices and Judges:

State law requires that, after July 1 and before December 1 of each year, the Uniform Retirement System for Justices and Judges (URSJJ) publish an annual report that covers the operation of URSJJ during the past fiscal year, including income, disbursements and the financial condition at the end of the fiscal year. This report is published, in part, to fulfill that requirement for the fiscal year ended June 30, 2015.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal control that it has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

RSM US LLP, Certified Public Accountants, has issued an unmodified opinion on the Uniform Retirement System for Justices and Judges' statements of fiduciary net position as of June 30, 2015 and 2014, and the related statements of changes in fiduciary net position for the years then ended. The independent auditor's report is located at the front of the Financial Section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complements this letter of transmittal and should be read in conjunction with it.

Profile of the Plan

URSJJ is a single-employer public employee retirement plan, which is a defined benefit pension plan, covering all justices and judges of the Oklahoma Supreme Court, Court of Criminal Appeals, Workers' Compensation Court, Court of Appeals, and District Courts. URSJJ is administered by the Oklahoma Public Employees Retirement System (OPERS) and its Board of Trustees (the Board). The employee and employer contribution rates are established by the Oklahoma Legislature after recommendation by the Board based on an actuarial calculation which is performed to determine the adequacy of such contribution rates.

Members qualify for full retirement benefits at their normal retirement age, defined as: (1) when the sum of the member's age and years of credited service equals 80 or (2) at age 65 with 8 years of judicial service, (age 67 with 8 years of judicial service if becoming a member on or after January 1, 2012), or (3) at age 60 with 10 years of judicial service (age 62 with 10 years of judicial service if becoming a member on or after January 1, 2012). Benefits are determined at 4% of the member's

Letter of Transmittal (continued)

average salary, as defined, multiplied by the number of years of service, not to exceed 100% of the member's average monthly salary received as a justice or judge for the highest 36 months of compensation. Justices and judges retiring after September 1, 2005, may elect a maximum benefit with no survivor option or one of two actuarially reduced retirement benefits that provide for a lifetime benefit to be paid to the member's joint annuitant after the member's death. The original surviving spouse benefit for married judges who were members prior to September 1, 2005, continues to be available. Effective September 1, 2005, all justices and judges pay a uniform contribution rate of 8%.

The Board of Trustees of OPERS consists of thirteen appointed members, some by position and some by association. Those serving through position are a member of the Corporation Commission or the Commission's designee selected by the Commission, the Director of the Office of Management and Enterprise Services or the Director's designee, the State Insurance Commissioner or the Commissioner's designee, the Director of Human Capital Management of the Office of Management and Enterprise Services, and a member of the Tax Commission selected by the Tax Commission. Of the remaining members, three are appointed by the Governor, one is appointed by the Supreme Court, two are appointed by the Speaker of the House of Representatives and two are appointed by the President Pro Tempore of the Senate. Qualifications for certain of these appointees include a balance of individuals having experience in investment management, pension management, public fund management, the banking profession or a licensed attorney or a licensed accountant.

Each year, OPERS, along with other state agencies, is required to file a budget work program with the Office of Management and Enterprise Services. Administrative overhead expenses of URSJJ, including personnel and other supporting services costs, are paid for by OPERS and allocated to URSJJ based on an estimate of the cost of services provided. The allocated costs are charged to URSJJ and paid with funds provided through operations of URSJJ. The OPERS budget work program, which includes the costs related to URSJJ, is approved by the Board and includes a description of all funds available for expenditure and shows spending by major program category. URSJJ receives no state appropriations and is funded through employee and employer contributions and investment earnings.

Additionally in each even-numbered year, OPERS, along with other state agencies, must file a strategic plan covering five fiscal years beginning with the next odd-numbered fiscal year. The strategic plan includes a mission statement, the core values and behaviors inherent to operations, and a summary of goals and objectives to be achieved through specific projects outlined for the five-year period. The mission of the OPERS Board and staff is to provide and promote comprehensive, accountable and financially sound retirement services to Oklahoma's public servants in a professional, efficient and courteous manner. The core values and behaviors inherent to the agency's operations are honesty, integrity and accountability; excellence in service; and commitment to teamwork and team members. The summary of goals and objectives outlined in the strategic plan are:

- Provide prompt and comprehensive customer service
- Manage the assets of the Plans in a fiscally responsible manner
- Inform and educate all members to help them identify and meet their retirement goals
- Maintain a competent and well-trained workforce
- Achieve and maintain well-funded status to assist the State in paying retirement benefit obligations, and secure changes in plan design that make the plan easier to understand or more equitable without an undue increase in the retirement system's liabilities.

Investments

The standard for URSJJ in making investments is to exercise the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and unless under the circumstances it is clearly prudent not to do so. URSJJ's funds are invested solely in the best interest of the members and their beneficiaries with a goal of keeping administrative expenses as low as possible. The Board has established an investment policy and guidelines that identify asset allocation as the key

Letter of Transmittal (continued)

determinant of return and diversification, both by and within asset classes, as the primary risk control element. Passive fund portfolios are considered to be suitable investment strategies, especially in highly efficient markets.

The Board engages outside investment managers to manage the various asset classes where URSJJ has exposure. At fiscal year end, the investment portfolio of URSJJ was actively managed by three fixed income managers and passively managed by another investment manager with holdings in one fixed income index fund, two domestic equity index funds and one international equity index fund.

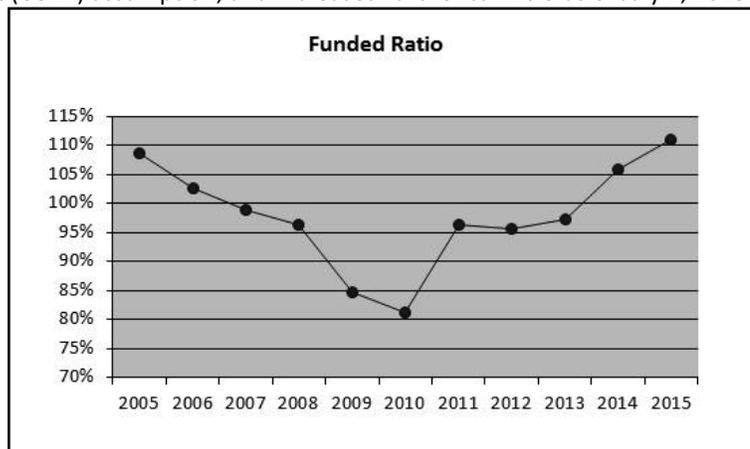

Included in the Investment Section of this report are a summary of the Investment Portfolio by Type and Manager and a comparison of the above amounts to the target allocations, as shown in the Asset Comparison chart. For fiscal year 2015, investments provided a 2.8 percent rate of return. The annualized rate of return for URSJJ was 10.5 percent over the last three years and 10.8 percent over the last five years.

Funding

A pension fund is well funded when it has enough money in reserve to meet all expected future obligations to participants. It must also have a revenue source sufficient to keep up with future obligations. The funding objective for URSJJ is to meet long-term benefit promises through contributions that remain approximately level as a percent of member payroll. The greater the level of funding, the larger the ratio of assets accumulated to the actuarial accrued liability and the greater the level of investment potential. The advantage of a well-funded plan is that the participants can look at assets that are committed to the payment of benefits. The actuarial accrued liability and actuarial value of assets as of July 1, 2015 amounted to \$266.4 million and \$295.4 million, respectively.

The URSJJ funded ratio had been steadily declining from 2002 to 2010, falling below 100 percent for the first time at July 1, 2007 and declining further to 81.3 percent at July 1, 2010 before rebounding significantly to 96.3 percent at July 1, 2011 due to the removal of the cost-of-living-adjustment (COLA) assumption, and increased further to 110.9 as of July 1, 2015.

The funded ratio was 148.2 percent at June 30, 2002. In part this overall decline was due to an employer contribution rate decrease in January 2001 and the lifting of the salary cap for benefit calculation for the past seven years. Effective July 1, 2005, in an effort to address the decline, the employer rate was increased 1.0 percent annually for two years, and at July 1, 2007 it was increased 1.5 percent annually up to 22.0 percent for fiscal years ending 2019 and thereafter. However, based on a projection model prepared by the URSJJ actuary, the scheduled increases in the statutory contribution rate are not expected to be sufficient to reach

the actuarial contribution rate before the end of the amortization period of the unfunded actuarial accrued liability, even if all the actuarial assumptions are met in future years. In 2006 the Legislature provided a statutory requirement that retirement bills be analyzed for actuarial fiscal impact and contains adequate funding sources sufficient to pay the cost of the change. In the session ended May 2009 the Legislature designated \$6.0 million in the Supreme Court's Management Information System Fund to pay employer contributions to the Plan in fiscal year 2010. A detailed discussion of funding is provided in the Actuarial Section of this report.

Letter of Transmittal (continued)

Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Uniform Retirement System for Justices and Judges for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2014. This was the seventeenth year URSJJ has received this prestigious award. In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report that satisfies both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current comprehensive annual financial report continues to conform to the Certificate of Achievement program requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this report would not have been possible without the efficient and dedicated service of the entire staff of OPERS. We wish to express our appreciation to all staff members who assisted and contributed to the preparation of this report. Credit also must be given to the Board of Trustees for their unfailing support for maintaining the highest standards of professionalism in the financial management of the Uniform Retirement System for Justices and Judges.

Respectfully submitted,

Joseph A. Fox

November 30, 2015

Dear Members:

On behalf of the Board of Trustees, I am pleased to present the Comprehensive Annual Financial Report for the Uniform Retirement System for Justices and Judges (URSJJ) for the fiscal year ending June 30, 2015.

This report is designed to provide a detailed look at the financial, investment and actuarial aspects of the System, which continues to be a strong retirement system.

You are encouraged to carefully review this report, as it contains a wealth of information about your retirement system. If you have questions or comments, please feel free to contact us. We can be reached at P.O. Box 53007, Oklahoma City, Oklahoma 73152-3007. Our telephone number is 405-858-6737 (or toll-free 1-800-733-9008).

I also want to thank the staff for their diligent work in preparing this report and their commitment to continually improve the administrative operations necessary to operate your retirement system.

Sincerely,

DeWayne McAnally

UNDERSTANDING RETIREMENT RISKS

Risk is something every retiree needs to understand. It is important to build safeguards into your retirement plan, because after you stop working, there are fewer opportunities to overcome these new risks.

Retirement, compared to just a generation ago, most likely will be a very long event. No one knows exactly how long their retirement will last, but most will underestimate the resources needed for this stage of life. Longevity is not the only risk factor to consider. Increasing cost of health-care, inflation, and diminishing purchasing power are all risks to be taken into account for a successful retirement.

Independent Auditor's Report

Board of Trustees
Uniform Retirement System for Justices and Judges

Report on the Financial Statements

RSM US LLP

We have audited the accompanying financial statements of the Uniform Retirement System for Justices and Judges (the Plan), a component unit of the state of Oklahoma, which comprise the statement of fiduciary net position as of June 30, 2015, and the related statement of changes in fiduciary net position for the year then ended and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Uniform Retirement System for Justices and Judges as of June 30, 2015, and the respective changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

THE POWER OF BEING UNDERSTOOD
AUDIT | TAX | CONSULTING

Other Matters

The financial statements of the Plan, as of and for the year ended June 30, 2014, were audited by other auditors whose report dated October 22, 2014, expressed an unmodified opinion on those statements.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the required supplementary information included in schedules 1 through 3 be presented to supplement the financial statements. Such information, although not a part of the financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audit of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as of and for the year ended June 30, 2015, as a whole. The information included in the Introductory Section, the Investment Section, the Actuarial Section, the Statistical Section, and schedules 4 through 6 is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information in schedules 4 through 6 for the year ended June 30, 2015, has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information in schedules 4 through 6 for the year ended June 30, 2015, is fairly stated in all material respects in relation to the financial statements as a whole. The supplementary information for the year ended June 30, 2014 on schedules 4 through 6 was audited by other auditors whose report, dated October 22, 2014, expressed an unmodified opinion on such information in relation to the financial statements as a whole.

The information in the Introductory Section, the Investment Section, the Actuarial Section, and the Statistical Section has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we express no opinion on it.

Management's Discussion and Analysis (Unaudited)

As management of the Uniform Retirement System for Justices and Judges (the Plan) we offer readers of the Plan's financial statements this narrative overview and analysis of the financial activities of the Plan for the fiscal years ended June 30, 2015 and 2014.

Financial Highlights

- The net position restricted for pensions totaled approximately \$301.3 million at June 30, 2015, compared to \$301.5 million at June 30, 2014 and \$263.2 million at June 30, 2013. The net position restricted for pensions is available for payment of monthly retirement benefits and other qualified distributions to the Plan's participants. The decrease of \$0.2 million and increase of \$38.2 million of the respective years have resulted primarily from the changes in the fair value of the Plan's investments due to volatile equity markets.
- At June 30, 2015, the total number of members participating in the Plan was 549, compared to 527 at June 30, 2014 and 522 at June 30, 2013. The total number of retirees was 260 and 235 at June 30, 2015 and 2014, showing a 10.6% increase and 2.2% increase for each respective year. At June 30, 2013, the total number of retirees was 230.

Overview of the Financial Statements

The Plan is a single-employer, public employee retirement plan, which is a defined benefit pension plan. The Plan covers all Justices and Judges of the Oklahoma Supreme Court, Court of Criminal Appeals, Workers' Compensation Court, Court of Appeals, and District Courts. Benefits are determined at 4% of the average monthly compensation received as a justice or judge based on the highest thirty-six months of compensation multiplied by the number of years of credited service, not to exceed 100% of the retiree's average monthly salary received as a justice and judge for the highest thirty-six months of compensation. Normal retirement ages under the Plan are 62 with 10 years of judicial service, 67 with 8 years of judicial service, or when the sum of the member's age and years of credited service equals or exceeds 80 (Rule of 80). Members become eligible to vest fully upon termination of employment after attaining eight years of service as a justice or judge, or the members' contributions may be withdrawn upon termination of employment.

The Plan's financial statements are comprised of a Statement of Fiduciary Net Position, a Statement of Changes in Fiduciary Net Position, and Notes to Financial Statements. Also included is certain required supplementary information and supplementary information.

The Plan is a component unit of the state of Oklahoma (the State) and is administered by the Oklahoma Public Employees Retirement System, a component unit of the State, which together with the Plan and other similar funds comprise the fiduciary-pension trust funds of the State.

The *statement of fiduciary net position* presents information on the Plan's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and the resulting *net position restricted for pensions*. This statement reflects the Plan's investments, at fair value, along with cash and cash equivalents, receivables, and other assets and liabilities.

The *statement of changes in fiduciary net position* presents information showing how the Plan's net position restricted for pensions changed during the years ended June 30, 2015 and 2014. It reflects contributions by members and participating employers along with deductions for retirement benefits, refunds and withdrawals, and administrative expenses. Investment income during the period is also presented showing income from investing and securities lending activities.

Management's Discussion and Analysis (continued) (Unaudited)

The *notes to financial statements* provide additional information that is essential to a full understanding of the data provided in the financial statements.

The *required supplementary information* presents a schedule of changes in the net pension liability, schedule of net pension liability, schedule of employer contributions, and schedule of investment returns. Schedules of certain expenses and fees paid are presented as *supplementary information*.

Financial Analysis

The following are the condensed Schedules of Fiduciary Net Position and Changes in Fiduciary Net Position for the Uniform Retirement System for Justices and Judges for the fiscal years ended June 30, 2015, 2014, and 2013.

Condensed Schedule of Fiduciary Net Position

(\$ millions)

	June 30		
	2015	2014	2013
Assets:			
Cash and cash equivalents	\$ 3.3	\$ 1.6	\$ 6.1
Receivables	9.7	9.7	26.3
Investments	306.6	303.9	265.0
Securities lending collateral	15.1	13.9	14.8
Total assets	334.7	329.1	312.2
Liabilities:			
Other liabilities	18.3	13.7	34.2
Securities lending collateral	15.1	13.9	14.8
Total liabilities	33.4	27.6	49.0
Ending net position restricted for pensions	\$ 301.3	\$ 301.5	\$ 263.2

Condensed Schedules of Changes in Fiduciary Net Position

(\$ millions)

	June 30		
	2015	2014	2013
Member contributions	\$ 2.7	\$ 2.5	\$ 2.5
State and local agency contributions	5.3	4.6	4.1
Net investment income	8.2	46.2	27.5
Total additions	16.2	53.3	34.1
Retirement, death and survivor benefits	16.1	14.9	14.6
Refunds and withdrawals	0.1	0.1	-
Administrative expenses	0.1	0.1	0.1
Total deductions	16.3	15.1	14.7
Net (decrease) increase in net position	\$ (0.1)	\$ 38.2	\$ 19.4

For the year ended June 30, 2015, fiduciary net position decreased \$0.1 million, or 0.1%. Total assets increased by \$5.6 million, or 1.7%, due to an increase of 0.9% in investments and an increase of 9.1% in securities lending collateral, partially offset by a decrease of 0.3% in pending sales of securities. Total liabilities increased 21.0% primarily due to a 33.1% increase in pending purchases of securities and a 9.1% increase in securities lending collateral.

Fiscal year 2015 showed a \$37.2 million decrease in total additions and a \$1.2 million increase in total deductions. Compared to the prior year, additions decreased 69.7% due to a decrease in the fair value of investments of \$38.0 million. The 8.1% increase in total deductions was primarily due to a 7.7% increase in retirement benefits. Administrative costs were 8.6% more when compared to the prior year in spite of a 1.0% decrease in the allocation percentage.

Management’s Discussion and Analysis (continued) (Unaudited)

For the year ended June 30, 2014, fiduciary net position increased \$38.2 million, or 14.5%. Total assets increased by \$16.9 million, or 5.4%, due to an increase of 14.7% in investments, partially offset by decreases of 65.5% in pending sales of securities, and 6.2% in securities lending collateral. Total liabilities decreased 43.7% primarily due to a 59.9% decrease in pending purchases of securities.

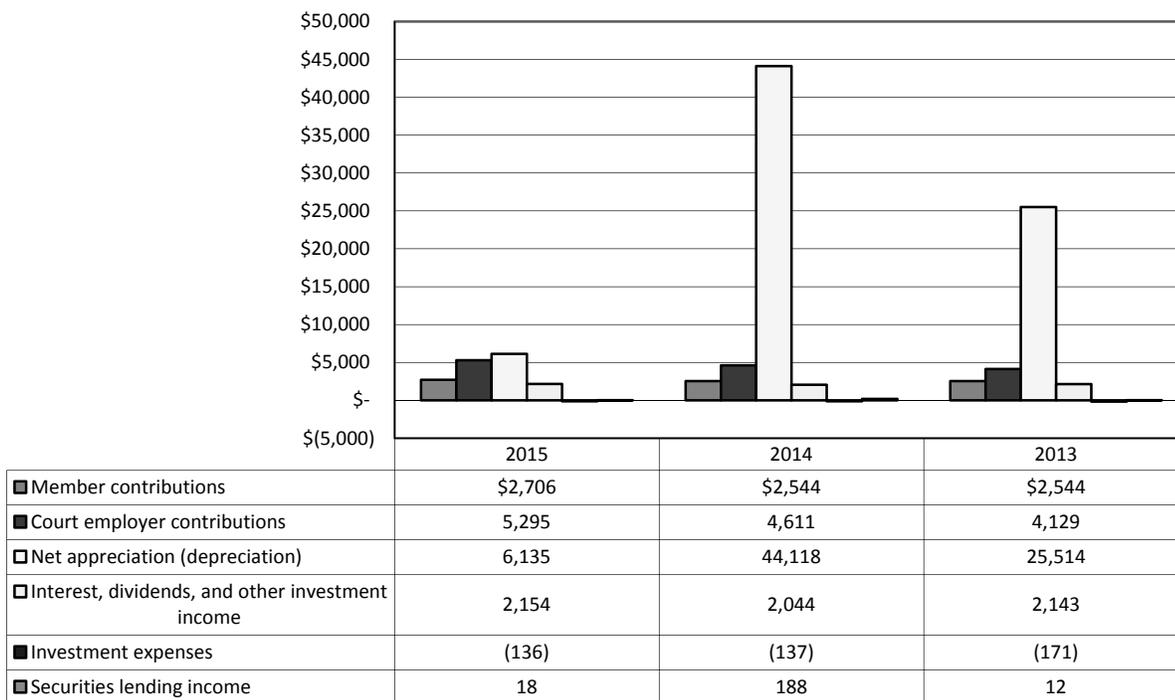

Fiscal year 2014 showed a \$19.2 million increase in total additions and a \$0.4 million increase in total deductions. Compared to the prior year, additions increased 56.2% due to an increase in the fair value of investments of \$18.6 million. The 2.5% increase in total deductions was primarily due to a 2.3% increase in retirement benefits. Administrative costs were 3.3% more when compared to the prior year due to a 0.4% increase in the allocation percentage.

Additions to Fiduciary Net Position

For the year ended June 30, 2015, additions to fiduciary net position decreased \$37.2 million, or 69.7%, from the prior year. The negative appreciation in the fair value of investments of \$(38.0) million is reflective of the slowing market, compared to fiscal year 2014. Interest income increased \$0.1 million, or 5.4%, and securities lending income decreased 89.3%. Contributions increased \$0.8 million, or 11.8%, because of the statutory increase in the contribution percentage for participating court employers.

Additions to Fiduciary Net Position

Comparative Data for Fiscal Years Ended June 30, 2015, 2014 and 2013
(\$ thousands)

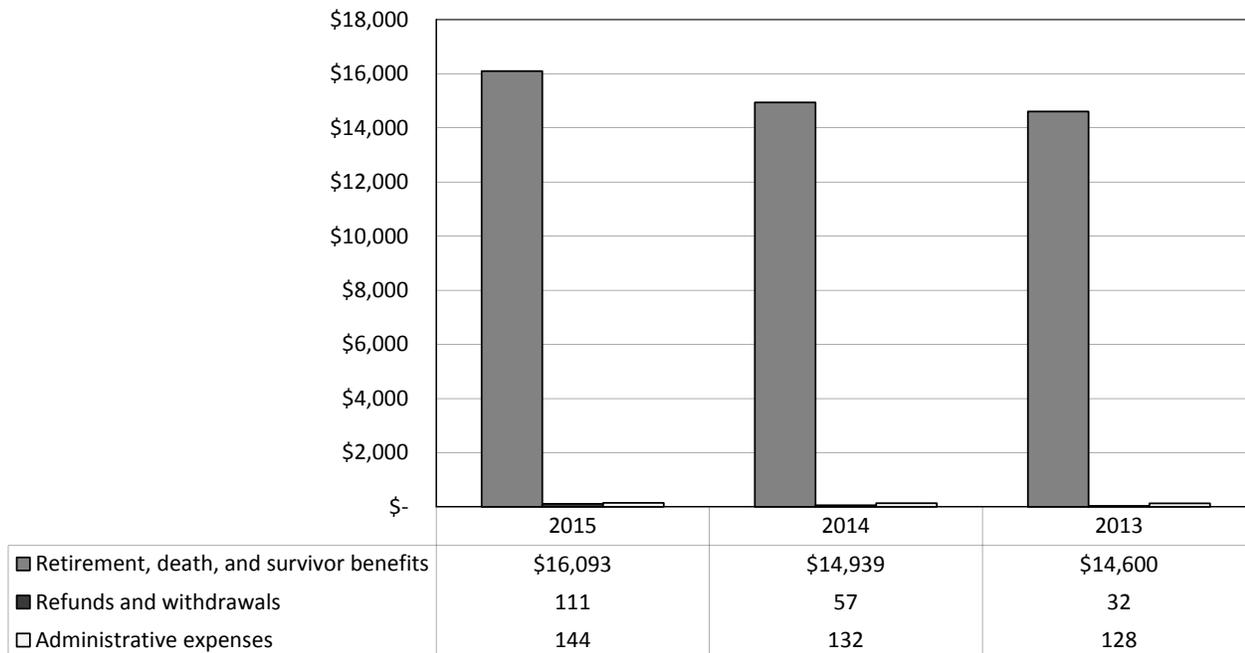

Management’s Discussion and Analysis (continued) (Unaudited)

For the year ended June 30, 2014, additions to fiduciary net position increased \$19.2 million, or 56.2%, from the prior year. The appreciation in the fair value of investments of \$18.6 million is reflective of the improving market, particularly in domestic and international equities. Interest income decreased \$0.1 million, or 4.6%, as a result of falling interest rates, and securities lending income increased 1,461.3% compared to the prior year due to a recoupment of securities lending income from BlackRock for the years 2002 through 2013 due to a review of the Plan’s Most Favored Nations clause. Contributions increased \$0.5 million, or 7.2%, because of the statutory increase in the contribution percentage for participating court employers.

Deductions to Fiduciary Net Position

For the year ended June 30, 2015, total deductions increased \$1.2 million, or 8.1%, from the prior year. Retirement, death, and survivor benefits increased \$1.2 million, or 7.7%, and the average benefit increased 3.1% due to a 10.6% increase in the number of retirees. Refunds and withdrawals increased 95.2% from the prior year because the total amount withdrawn is dependent on contribution amounts of the specific members electing to withdraw contributions each year. Administrative costs increased 8.6% when compared to the prior year due to an overall increase in personnel costs in spite of a decrease in the allocation rate of 1.0%.

Deductions to Fiduciary Net Position
Comparative Data for Fiscal Years Ended June 30, 2015, 2014 and 2013
 (in \$000's)

For the year ended June 30, 2014, total deductions increased \$0.4 million, or 2.5%, from the prior year. Retirement, death, and survivor benefits increased \$0.3 million, or 2.3%, and the average benefit increased 1.2% due to a 2.2% increase in the number of retirees. Refunds and withdrawals increased 78.7% from the prior year because the total amount withdrawn is dependent on contribution amounts of the specific members electing to withdraw contributions each year. Administrative costs increased 3.3% when compared to the prior year due to an increased allocation rate of 0.4% and increases in personnel costs.

Management’s Discussion and Analysis (continued)
 (Unaudited)

Investments

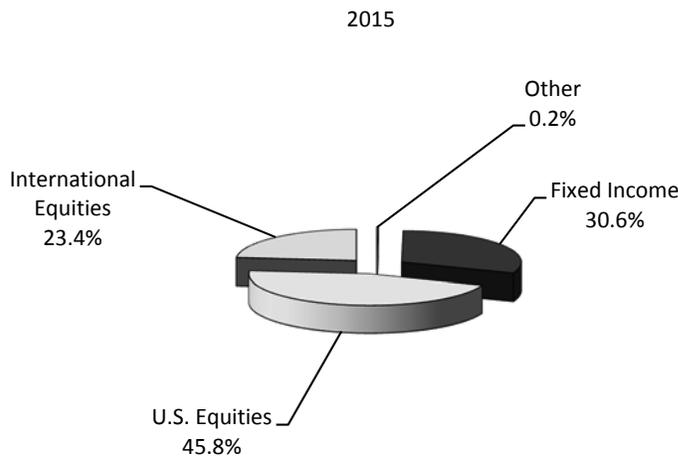

The investment portfolio is reported in the chart below by the asset class of the investment managers’ portfolios which includes the cash equivalents in those portfolios. A summary of the Plan’s cash equivalents and investments for fiscal years ended June 30, 2015, 2014, and 2013 is as follows:

Cash, Cash Equivalents, and Investment Portfolio
 (\$ millions)

	June 30		
	2015	2014	2013
Fixed income	\$ 101.1	\$ 94.5	\$ 94.0
U.S. equities	137.6	135.8	112.9
International equities	70.4	74.2	63.3
Other	0.7	0.9	0.8
Total managed investments	309.8	305.4	271.0
Cash equivalents on deposit with State	0.1	0.1	0.1
Securities lending collateral	15.1	13.9	14.8
Total cash, cash equivalents, and investments	\$ 325.0	\$ 319.4	\$ 285.9

The increase in the Plan’s managed investments is reflective of the increase in fixed income and domestic equity markets for the year. The Plan’s overall return for the year ended June 30, 2015 was 2.8%. A 2.4% return for the fixed income component exceeded the market trend for the asset class. Equity index funds correlated closely with market trends with U.S. and international equities showing returns of 7.4% and -5.0%, respectively. Amounts of \$8.1 million of U.S. equity index funds were used to supplement the cash requirements of monthly retiree benefit payments. The change in securities lending collateral is dependent on the securities loaned by the Plan’s master custodian at year end.

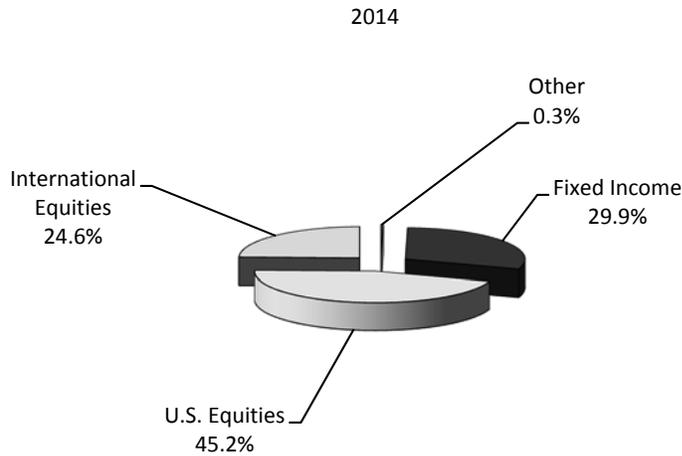

At June 30, 2015, the distribution of the Plan’s investments including accrued income and pending trades was as follows:

The increase in the Plan’s managed investments is reflective of the increase in domestic and international equity markets for the year. The Plan’s overall return for the year ended June 30, 2014 was 17.7%. A 5.1% return for the fixed income component exceeded the market trend for the asset class. Equity index funds correlated closely with market trends with U.S. and international equities showing returns of 25.1% and 22.0%, respectively. Amounts of \$4.95 million of U.S. equity index funds and \$2.95 million of international equities were used to supplement the cash requirements of monthly retiree benefit payments. The change in securities lending collateral is dependent on the securities loaned by the Plan’s master custodian at year end.

Management’s Discussion and Analysis (continued)
 (Unaudited)

At June 30, 2014, the distribution of the Plan’s investments including accrued income and pending trades was as follows:

Economic Factors

Ratio of Fiduciary Net Position to Total Pension Liability

The manner of calculating the funded ratio changed during fiscal year 2014 due to the adoption of GASB Statement No. 67, *Financial Reporting for Pension Plans*.

	June 30	
	2015	2014
Total pension liability	\$ 266,400,026	\$ 258,787,677
Plan fiduciary net position	\$ 301,296,105	\$ 301,469,209
Ratio of fiduciary net position to total pension liability	113.10%	116.49%

Plan Amendment

No Plan provision changes were enacted by the State Legislature during the session ended in May 2015.

Other

Other than changes in the fair value of Plan assets as may be impacted by the equity and bond markets and changes in the Plan provisions that may have an effect on the actuarial liability, no other matters are known by management to have a significant impact on the operations or financial position of the Plan.

Requests for Information

This financial report is designed to provide a general overview of the Plan’s finances for all those with an interest. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Financial Reporting Division, OPERS, P.O. Box 53007, Oklahoma City, Oklahoma 73152-3007.

Notes to Financial Statements

June 30, 2015 and 2014

(1) Summary of Significant Accounting Policies

The following are the significant accounting policies followed by the Uniform Retirement System for Justices and Judges (the Plan).

(a) *Basis of Accounting*

The financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting under which expenses are recorded when the liability is incurred, revenues are recorded in the accounting period in which they are earned and become measurable, and investment purchases and sales are recorded as of their trade dates. Member and employer contributions are established by statute as a percentage of salaries and are recognized when due, pursuant to legal requirements. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan.

The Plan, together with other similar fiduciary – pension trust funds of the state of Oklahoma (the State), is a component unit of the State. The Plan is administered by the Oklahoma Public Employees Retirement System (OPERS). As set forth in Title 20 of the Oklahoma Statutes, at Section 1108, a portion of the administrative overhead expenses, including personnel and other supporting services costs, which are paid for by a separate retirement fund also administered by OPERS, are allocated to the Plan. The allocation is based on OPERS' estimate of the cost of services provided to the Plan by the separate fund. Allocated costs are charged to the Plan and paid with funds provided through operations of the Plan.

(b) *Investments*

The Plan is authorized to invest in eligible investments as approved by the Board of Trustees of OPERS (the Board) as set forth in its investment policy.

Plan investments are reported at fair value. Short-term investments include bills and notes and commercial paper. Short-term investments, domestic debt securities, and equity securities are reported at fair value, as determined by the Plan's custodial agent, generally based on pricing services or prices quoted by independent brokers. The fair value of the pro rata share of units owned by the Plan in index and commingled trust funds is determined by the respective fund trustees based on quoted sales prices of the underlying securities.

Cash equivalents include investments in money market funds and investment pools and are reported at amortized cost.

Net investment income (loss) includes net appreciation (depreciation) in the fair value of investments, interest income, securities lending income and expenses, dividend income, and investment expenses, which includes investment management and custodial fees and all other significant investment related costs.

The Plan's investment policy provides for investments in combinations of stocks, bonds, fixed income securities, and other investment securities, along with investments in commingled trust and index funds. Investment securities and investment securities underlying the trust and index fund investments are exposed to various risks, such as interest rate and credit risks. Due to the risks associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities may occur in the near term, and those changes could materially affect the amounts reported in the statements of fiduciary net position.

Notes to Financial Statements (continued)

(c) Use of Estimates

The preparation of the Plan's financial statements, in conformity with U.S. generally accepted accounting principles, requires the Plan administrator to make significant estimates and assumptions that affect the reported amounts of net position restricted for pensions at the date of the financial statements and the actuarial information included in Note (5) Net Pension Liability and Actuarial Information and the required supplementary information (RSI) as of the benefit information date, the changes in plan net position during the reporting period, and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

(d) Risk and Uncertainties

Contributions to the Plan and the actuarial information included in Note (5) Net Pension Liability and Actuarial Information and the RSI are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions may occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

(e) Composition of Board of Trustees

The Board of Trustees consists of thirteen appointed members, some by position and some by association. Those serving through position are a member of the Corporation Commission as selected by the Commission, a member of the Tax Commission as selected by the Tax Commission, the Administrator of the Office of Personnel Management or designee, the State Insurance Commissioner or designee, and the Director of State Finance or designee. Of the remaining members, three are appointed by the Governor, one is appointed by the Supreme Court, two are appointed by the Speaker of the House of Representatives and two are appointed by the President Pro Tempore of the Senate. Qualifications for certain of these appointees include a balance of individuals having experience in investment management, pension management, public fund management, the banking profession or a licensed attorney or a licensed accountant.

(2) Plan Descriptions and Contribution Information

The following brief description of the Plan is provided for general information purposes only. Participants should refer to Title 20 of the Oklahoma Statutes, Sections 1101 through 1111, for more complete information.

(a) General

The Plan is a single-employer public employee retirement plan, which is a defined benefit pension plan covering all justices and judges of the Oklahoma Supreme Court, Court of Criminal Appeals, Workers' Compensation Court, Court of Appeals, and District Courts. The supervisory authority for the management and operation of the Plan is the Board, which acts as a fiduciary for investment of the funds and the application of Plan interpretation.

Notes to Financial Statements (continued)

At June 30, the Plan's membership consisted of:

	2015	2014
Inactive members or their beneficiaries currently receiving benefits	260	235
Inactive members entitled to but not yet receiving benefits	18	18
Active members	271	274
Total	549	527

*The Plan includes 24 and 23 nonvested terminated members entitled to a refund of their member contributions as of June 30, 2015 and 2014.

(b) Benefits

Benefits are determined at 4% of the member's average monthly compensation for covered active service over the highest thirty-six months of compensation as a justice or judge times the total years of service in the Plan not to exceed 100% of the retiree's average monthly salary received as a justice or judge for the highest thirty-six months of compensation.

Normal retirement ages under the Plan are as follows:

For participants who became members prior to January 1, 2012:

- When the sum of at least 8 years of credited years and age equals or exceeds 80 (Rule of 80)
- Age 65 with 8 years of judicial service
- Age 60 with 10 years of judicial service

For participants who became members on or after January 1, 2012:

- Age 67 with 8 years of judicial service
- Age 62 with 10 years of judicial service

Members are eligible to vest fully upon termination of judicial service after accumulating eight years of judicial service, or the member's contributions may be withdrawn at the time such member ceases to be a justice or judge of a court within the Plan. Disability retirement benefits are available for members who have attained age 55 and have 15 years of continuous judicial service and are determined to be disabled by the Court of the Judiciary. The benefits are calculated in the same manner as the normal retirement benefit. The Court of the Judiciary may override these requirements if it is determined that any judge or justice is no longer capable of performing regular duties.

Upon the death of an active member, the Plan will pay to the designated beneficiary the active member's accumulated employee contributions. However, if the deceased member contributed to survivor benefits, an eligible spouse of the member may choose to vest the member's service (8 years required) until the spouse is eligible to receive monthly survivor benefits as defined by the Plan.

Upon the death of a retired member, the Plan will pay a \$5,000 death benefit to the member's beneficiary or estate of the member if there is no living beneficiary. The death benefit will be paid in addition to any excess employee contributions or survivor benefits due to the estate or beneficiary. Death benefits paid for the years ended June 30, 2015 and 2014 totaled approximately \$35,000 and \$33,000, respectively.

Notes to Financial Statements (continued)

Surviving spouse benefits are paid to a member’s spouse, provided the member makes the required contributions and the spouse qualifies under the Plan provisions. These payments are made monthly over the remaining life of the spouse. If the member has ten years of service and the death is determined by the Workers’ Compensation Court to be employment related, the benefit is payable immediately to the spouse. Members must have eight years of credited service before their spouses are eligible for normal survivor benefits. The benefit payment is equal to 50% up to 65% of the normal retirement benefit if certain contributions and other criteria are met. Effective September 1, 2005, survivor benefits are also available to the retiree’s designated joint annuitant according to the option elected by the member. The first option gives the member a reduced lifetime annuity with 50% of the amount paid to the member’s survivor at the member’s death. The second option pays the member an even further reduced annuity with the same amount paid to the survivor after the member’s death.

Benefits are established and may be amended by the State Legislature.

(c) Contributions

The contribution requirements of the Plan are an established rate determined by the Oklahoma Legislature and are based on a comparison to an actuarial calculation which is performed to determine the adequacy of the contribution rate.

The contribution rate of all justices and judges is 8% of a member’s monthly salary. The member may elect a maximum benefit with no survivor option or one of two types of actuarially reduced retirement benefits that provide for a lifetime benefit to be paid to the member’s joint annuitant after the member’s death. This election is available for any judge or justice without regard to marital status. Prior to September 2005, the basic member contributions were 5% of a member’s monthly salary. Each member of the Plan who was married provided for spousal survivor benefits and contributed at the rate of 8% unless the member’s spouse agreed to waive spousal benefits. Participating court employers are required to contribute monthly a percentage of the gross salaries of the active members of the Plan. The percentages established by the Oklahoma Legislature for the years ended June 30, 2015 and 2014 were 16.0% and 14.5%, respectively, of member payroll.

Effective for the fiscal year ended June 30, 2016, the employer contribution rate will increase to 17.5% of payroll and will increase 1.5% annually up to 22% for fiscal years ending June 30, 2019 and thereafter.

Prior to July 2009, the Board was authorized to adjust the contribution rate to prevent a funded ratio of the Plan of less than 100%. Effective July 1, 2009, the statutory responsibility of the Board was modified to adjust the employer contribution rate to prevent a funded ratio below the target of “at or near” ninety percent. In May 2010, legislation was enacted to remove the authority of the Board to adjust the employer contribution rate.

(3) Cash Equivalents

Cash equivalents represent short-term investment funds held by the Office of the State Treasurer (State Treasurer) and the Plan’s custodial agent.

At June 30, cash equivalents were:

	2015	2014
Cash equivalents		
State Treasurer	\$ 92,928	\$ 117,055
Custodial agent	3,210,251	1,525,106
Total cash and cash equivalents	\$ 3,303,179	\$ 1,642,161

Notes to Financial Statements (continued)

Cash is deposited to *OK INVEST*, an internal investment pool of the State Treasurer with holdings limited to obligations of the U.S. Government, its agencies and instrumentalities, agency senior debt and mortgage-backed pass-through securities, tri-party repurchase agreements, money market mutual funds, collateralized certificates of deposit, commercial paper, obligations of state and local governments, and State of Israel Bonds. Participants are limited to qualifying agencies and funds within the State's reporting entity, and each participant maintains an interest in the underlying investments of *OK INVEST* and shares the risk of loss on the funds in proportion to the respective investment in the funds. The custodial agent cash equivalents consist of temporary investments in commingled trust funds of the Plan's custodial agent. The funds are composed of high-grade money market instruments with short maturities. Each participant in the funds shares the risk of loss on the funds in proportion to the respective investment in the funds.

Deposits are exposed to custodial credit risk if they are not covered by depository insurance and the deposits are uncollateralized, collateralized with securities held by the pledging financial institution, or collateralized with securities held by the pledging financial institution's trust department or agency but not in the depositor-government's name. At June 30, 2015 and 2014, the cash equivalents in *OK INVEST* and the Plan's custodial agent cash equivalents were not exposed to custodial credit risk because their existence cannot be evidenced by securities that exist in physical or book entry form.

(4) Investments

(a) General

The OPERS Statement of Investment Policy states that the Board believes that Plan assets should be managed in a fashion that reflects the Plan's unique liabilities and funding resources, incorporating accepted investment theory and reliable empirical evidence. Specifically, the Board has adopted the following principles:

- Asset allocation is the key determinant of return, and therefore, commitments to asset allocation targets will be maintained through a disciplined rebalancing program.
- Diversification, both by and within asset classes, is the primary risk control element.
- Passive fund portfolios are suitable investment strategies, especially in highly efficient markets. These index funds, which are externally managed by professional investment management firms selected through due diligence of the Board, are deemed to be actively managed accounts within the meaning of Section 909.1(D) of Title 74 of the Oklahoma Statutes.

The investment policy, guidelines, and objectives which govern the investment of Plan assets shall be developed and adopted by the Board of Trustees at a regularly scheduled public Board meeting, at least annually, prior to August 1 of each year. Changes to the investment policy may be made, as necessary, at any public meeting of the Board of Trustees, in compliance with the Open Meeting Act. During 2015, the investment policy was modified to allow investments in certain real estate-related assets.

At June 30, 2015 and June 30, 2014, the asset allocation guidelines established by policy were U.S. equities – 44%, international equities – 24%, and domestic fixed income – 32%. The guidelines also establish minimum and maximum percentages for each asset class allocation, and when allocations move outside these limits, portfolios are rebalanced.

Notes to Financial Statements (continued)

The fair value of investments held by the Plan at June 30 was as follows:

	2015	2014
U.S. Treasury notes/bonds	\$ 27,546,168	\$ 25,164,408
U.S. Treasury strips	-	4,456,946
U.S. TIPS index fund	8,594,008	8,737,317
Government agencies	3,021,485	3,877,811
Government mortgage-backed securities	23,746,389	21,084,215
Municipal bonds	659,563	956,014
Corporate bonds	17,924,386	16,064,767
Asset-backed securities	11,492,773	8,724,160
Commercial mortgage-backed securities	4,485,122	4,021,131
Non government backed collateralized mortgage obligations	1,130,765	786,177
U.S. equity index fund	137,561,299	135,856,006
International equity index funds	70,405,629	74,161,298
Securities lending collateral	15,128,885	13,871,786
Total investments	\$ 321,696,472	\$ 317,762,036

The Plan participates in fixed income and international and domestic equity index funds managed by BlackRock Institutional Trust Company, N.A. (BTC). BTC, a subsidiary of BlackRock, Inc., is a national banking association and operates as a limited purpose trust company. Its primary regulator is the Office of the Comptroller of the Currency (OCC), the agency of the U.S. Treasury Department that regulates United States national banks. Each fund is a collective fund which is a group trust and an entity separate from BTC, other funds, and the investing participants. BTC is trustee of each of the collective fund trusts and holds legal title to each trust's assets for the exclusive benefit of the Plan. The fair value of the Plan's position in the pool is the same as the value of the pool shares. In 2015 and 2014, the Plan invested in a fixed income index fund, two domestic equity index funds, and an international equity index fund. The Plan shares the risk of loss in these funds with other participants in proportion to its respective investment. Because the Plan does not own any specific identifiable investment securities of these funds, the risk associated with any derivative investments held in these funds is not apparent. The degree of risk depends on the underlying portfolios of the funds, which were selected by the Plan in accordance with its investment policy guidelines including risk assessment.

(b) Securities Lending

The Plan's investment policy provides for its participation in a securities lending program. The program is administered by the Plan's master custodian, and there are no restrictions on the amount of loans that can be made. During 2015 and 2014, the types of securities loaned were primarily U.S. Government and corporate bonds. Certain securities of the Plan are loaned to participating brokers, who must provide collateral in the form of cash, U.S. Treasury or Government Agency securities, or letters of credit issued by approved banks.

Under the terms of the securities lending agreement, collateral is required to be provided in the amount of 102% of the fair value of U.S. securities loaned and 105% of the fair value of non-U.S. securities loaned. At June 30, 2015 and 2014, the Plan has no credit risk exposure to borrowers because the amounts the Plan owes the borrowers exceed the amounts the borrowers owe the Plan. The securities on loan at June 30, 2015 and 2014 collateralized by cash collateral were \$14,801,742 and \$13,595,449, respectively, and the cash collateral received for those securities on loan was \$15,128,885 and \$13,871,786, respectively. In addition, the securities on loan at June 30, 2015 and 2014 collateralized by non-cash collateral were \$8,153,473 and \$4,253,771, respectively, and the market value of the non-cash collateral for those securities on loan was \$8,312,638 and \$4,338,168, respectively. The master custodian provides for full indemnification to the Plan for any losses that might occur in the program due to the failure of a broker to return a security that was borrowed (and if the collateral is inadequate to replace the securities lent) or failure to pay the Plan for income of the securities while on loan. The Plan cannot pledge or sell collateral securities unless the borrower defaults. The loan premium paid by the borrower of the securities is apportioned between the Plan and its custodial agent in accordance with the securities lending agreement. All securities loans can be terminated on demand by either the lender or the borrower.

Notes to Financial Statements (continued)

The securities lending agreement provides that cash collateral be invested in the custodial agent's short-term investment pool and sets forth credit quality standards, acceptable investments, diversification standards, and maturity and liquidity constraints for the investment fund. The Plan's investment guidelines do not require a matching of investment maturities with loan maturities but do establish minimum levels of liquidity and other investment restrictions designed to minimize the interest rate risk associated with not matching the maturities of the investments with the loans. At June 30, 2015 and 2014, the cash collateral investments had an average weighted maturity of 22 and 19 days, respectively, and the relationship between the maturities of the custodial agent's investment pool and the Plan's loans is affected by the maturities of the securities loans made by other entities that use the agent's pool, which the Plan cannot determine. The Plan's non-cash collateral is represented by its allocated share of a pool administered by the agent for the Plan and other pool participants.

(c) **Credit Risk**

Credit risk is the risk that an issuer or other counterparty to an investment will default or will otherwise not fulfill its obligations.

The Plan's investment guidelines provide for the domestic fixed income managers to follow one of four investment styles and specify quality guidelines for each style.

The *Constrained Core* manager will invest in a broadly diversified portfolio with characteristics similar to a broad fixed income market index, such as the Barclays Capital Aggregate Bond Index. The total portfolio minimum quality should be A as rated by Standard and Poor's (S&P). The portfolio should primarily consist of investment grade securities, with a minimum quality rating for any issue of BBB- (S&P) or its equivalent rating by at least one Nationally Recognized Statistical Rating Organization (NASRO). In the event that a credit rating is downgraded below this minimum, the investment manager shall immediately notify OPERS staff and provide an evaluation and recommended course of action.

The *Core Plus* manager will invest in a broadly diversified portfolio with characteristics similar to the Constrained Core manager and will add a "plus" of limited exposure to high yield bonds. The total portfolio minimum quality should be A as rated by S&P. No more than 20% of the portfolio shall consist of non-investment grade issues. The minimum quality rating for any issue is B (S&P) or its equivalent rating by at least one NASRO, and no more than 5% of a portfolio shall be invested in issues rated below BB (S&P) or its equivalent rating by at least one NASRO. In the event that a credit rating is downgraded below this minimum, the investment manager shall immediately notify OPERS staff and provide an evaluation and recommended course of action.

The *Interest Rate Anticipator* manager follows a style that seeks to correctly forecast the long term trend in interest rates and adjust the portfolio duration accordingly. The total portfolio minimum quality should be A as rated by S&P, and the portfolio should consist of investment grade securities only.

The *Passive* fixed income style consists of a TIPS index fund. TIPS are securities issued by the U.S. Government that are designed to protect the purchasing power of the investor.

At June 30, 2015, the domestic fixed income portfolio consisted of a constrained core fixed income portfolio, a core plus fixed income portfolio, a rate anticipator portfolio, and a passive U.S. TIPS index fund. All components met the stated policy restrictions, except the core fixed income portfolio, which held \$95,260 of the portfolio in issues rated below BBB-. At June 30, 2014, the domestic fixed income portfolio consisted of a constrained core fixed income portfolio, a core plus fixed income portfolio, a rate anticipator portfolio, and a passive U.S. TIPS index fund. All components met the stated policy restrictions, except the core fixed income portfolio, which held \$98,595 of the portfolio in issues rated below BBB-, and the core plus fixed income portfolio, which held \$114,456 of the portfolio in issues rated below B. The Plan's investment managers have advised retention of the securities after having assessed their risk/reward profiles.

Notes to Financial Statements (continued)

Investments issued by or explicitly guaranteed by the U.S. Government are not considered to have credit risk. At June 30, 2015, the Plan held 29.7% of fixed income investments that were not considered to have credit risk, 8.7% in a U.S. TIPS index fund made up of explicitly guaranteed U.S. Treasury Inflation-Protected Securities and 22.1% of fixed income investments that were implicitly guaranteed. Implicitly guaranteed investments primarily refer to bonds issued by a government sponsored entity (GSE) which is a government chartered corporation. This government charter implies that the government is unlikely to allow a GSE to default on its bond payments. At June 30, 2014, the Plan held 32.7% of fixed income investments that were not considered to have credit risk, 9.3% in a U.S. TIPS index fund made up of explicitly guaranteed U.S. Treasury Inflation-Protected Securities and 22.1% of fixed income investments that were implicitly guaranteed. Implicitly guaranteed investments primarily refer to bonds issued by a government sponsored entity (GSE) which is a government chartered corporation. This government charter implies that the government is unlikely to allow a GSE to default on its bond payments.

The Plan's exposure to credit risk at June 30, 2015 is presented below, in thousands, by investment category as rated by S&P or Moody's Investor Service.

	AAA/Aaa	AA/Aa	A/A	BBB/Baa	BB/Ba	B/B	CCC/Caa	Not Rated or Rating Not Available	Total

Notes to Financial Statements (continued)

The exposure to credit risk of the underlying investments of the Plan's cash equivalents at June 30 is as follows:

Credit Rating	2015		2014	
	OK INVEST	Custodial Agent	OK INVEST	Custodial Agent
AAA	12.7	11.3 %	5.0 %	22.1 %
AA	81.5	75.4	89.3	67.5
A1	2.3	12.0	2.4	9.4
BBB	—	—	—	—
BB	—	—	—	—
NR	3.5	1.3	3.3	1.0
	100.0 %	100.0 %	100.0 %	100.0 %

(d) Concentration of Credit Risk

Investments can be exposed to concentration of credit risk if significant amounts are invested in any one issuer. The Plan's investment policy states that portfolios managed on behalf of the Plan should not hold more than 5% of the outstanding securities of any single issuer. As of June 30, 2015 and 2014, the Plan did not have 5% or more of its total investments in any single issuer.

(e) Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment or a deposit. Duration is a measure of a debt investment's exposure to fair value changes arising from changing interest rates based upon the present value of cash flows, weighted for those cash flows as a percentage of the investment's full price. Effective duration estimates the sensitivity of a bond's price to interest rate changes and makes assumptions regarding the most likely timing and amounts of variable cash flows arising from investments such as callable bonds, collateralized mortgage obligations, and other mortgage-backed securities.

The Plan does not have a formal investment policy on interest rate risk. Interest rate risk is controlled through diversification of portfolio management styles.

At June 30, the Plan's exposure to interest rate risk as measured by effective duration is listed below by investment category.

	2015		2014	
	Fair Value	Effective duration in years	Fair Value	Effective duration in years
U.S. Treasury notes/bonds	\$ 27,546,168	11.3	\$ 25,164,408	7.8
U.S. Treasury strips	-	-	4,456,946	23.7
U.S. TIPS index fund	8,594,008	7.8	8,737,317	7.7
Government agencies	3,021,485	0.8	3,877,811	1.2
Government mortgage-backed securities	23,746,389	4.3	21,084,215	4.4
Municipal bonds	659,563	9.6	956,014	9.8
Corporate bonds	17,924,386	6.0	16,064,767	5.7
Asset-backed securities	11,492,773	0.9	8,724,160	1.0
Commercial mortgage-backed securities	4,485,122	2.1	4,021,131	2.7
Non government backed collateralized mortgage obligations	1,130,765	1.3	786,177	0.7
Total fixed income	\$ 98,600,659		\$ 93,872,946	
Portfolio duration		6.0		6.3

Notes to Financial Statements (continued)

Some investments' sensitivity to changing interest rates may derive from prepayment options embedded in an investment. Asset-backed securities, mortgage-backed securities, and collateralized mortgage obligations are pass-through securities that represent pooled debt obligations repackaged as securities that pass income and principal from debtors through the intermediary to investors.

Asset-backed securities are bonds or notes backed by loan paper or accounts receivable originated by banks, credit card companies, or other providers of credit and often enhanced by a bank letter of credit or by insurance coverage provided by an institution other than the issuer. At June 30, 2015 and 2014, the Plan held \$11,492,773 and \$8,724,160, respectively, in asset-backed securities.

Mortgage-backed securities are securities backed by mortgages issued by public and private institutions. At June 30, 2015 and 2014, the Plan held \$23,746,389 and \$21,084,215, respectively, in government mortgage-backed securities issued by the Federal Home Loan Mortgage Corporation (FHLMC), Government National Mortgage Association (GNMA), and Federal National Mortgage Association (FNMA) as well as \$4,485,122 and \$4,021,131, respectively, in commercial mortgage-backed securities.

Collateralized mortgage obligations (CMOs) are mortgage-backed bonds that allocate mortgage cash flows (interest and principal) into different maturity classes, called tranches. This is accomplished by dedicating mortgage cash flows to specific tranches and paying each tranche off, in turn by prespecified rules. In return for a lower yield, CMOs provide investors with increased security about the life of their investment compared to purchasing a pass-through mortgage-backed security. If mortgage rates drop (rise) sharply, prepayment rates will increase (decrease), and CMO tranches may be repaid before (after) the expected maturity. At June 30, 2015 and 2014, the Plan held \$1,130,765 and \$786,177, respectively, in non-government backed CMOs.

The exposure to interest rate risk of the underlying investments of the Plan's cash equivalents at June 30 is as follows:

Maturities (in days)	2015		2014	
	OK INVEST	Custodial Agent	OK INVEST	Custodial Agent
0 - 14	0.0 %	37.5 %	7.0 %	28.2 %
15 - 30	1.0	8.7	0.7	6.3
31 - 60	1.8	13.3	1.1	14.7
61 - 90	5.3	12.5	0.9	18.5
91 - 180	5.4	15.7	4.0	11.4
181 - 364	9.6	10.2	7.7	14.8
365 - 730	22.6	2.1	17.7	6.1
Over 730	54.3	0.0	60.9	0.0
	100.0 %	100.0 %	100.0 %	100.0 %

(f) Rate of Return

For the years ended June 30, 2015 and June 30, 2014, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expenses, was 2.75% and 17.83%, respectively. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Notes to Financial Statements (continued)

(5) Net Pension Liability and Actuarial Information

(a) Net Pension Liability (Asset) and Funding Progress

The Components of the net pension liability or asset of the employer at June 30 were as follows:

	2015	2014
Total pension liability	\$ 266,400,026	\$ 258,787,677
Plan fiduciary net position	\$ 301,296,105	\$ 301,469,209
Employer's net pension liability (asset)	<u>\$ (34,896,079)</u>	<u>\$ (42,681,532)</u>
Plan fiduciary net position as a percentage of the total pension liability	113.10%	116.49%

(b) Actuarial Methods and Assumptions

The total pension liability as of June 30, 2015 and 2014, was determined based on an actuarial valuation prepared as of July 1, 2015 and July 1, 2014, respectively, using the following actuarial assumptions:

- Salary increases – 5.00% per year, including inflation
- Post-retirement benefit increases – No increases assumed
- Investment return – 7.5% compounded annually net of investment expense, and including inflation
- Assumed inflation rate – 3.0%
- Payroll growth – 4.0% per year
- Actuarial cost method—Entry age
- Mortality Rates – RP-2000 Combined Active/Retired Healthy Mortality Table projected to 2010 using scale AA, set back one year

The actuarial assumptions used in the July 1, 2015 and 2014 valuations are based on the results of the most recent actuarial experience study, which cover the three-year period ending June 30, 2013. The experience study report is dated May 9, 2014

The long-term expected rate of return on pension plan investments was determined using a log-normal distribution analysis in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target asset allocation and best estimates of geometric real rates of return for each major asset class as of June 30, 2015 and 2014, are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
U.S. Large Cap Equity	38.0%	5.3%
U.S. Small Cap Equity	6.0%	5.6%
U.S. Fixed Income	25.0%	0.7%
International Stock	18.0%	5.6%
Emerging Market Stock	6.0%	6.4%
TIPS	3.5%	0.7%
Rate Anticipation	3.5%	1.5%
Total	<u>100.0%</u>	

Notes to Financial Statements (continued)

(c) **Discount rate.**

The discount rate used to measure the total pension liability was 7.50% for 2015 and 2014. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and the employer will be made at the current contribution rate as set out in state statute. Based on those assumptions, the pension plan’s fiduciary net position was projected through 2114 to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The discount rate determined does not use a municipal bond rate.

Sensitivity of the net pension liability or (asset) to changes in the discount rate.

The following presents the net pension liability or asset of the employer calculated using the discount rate of 7.50%, as well as what the plan’s net pension liability or asset would be if it were calculated using a discount rate that is one percentage point lower (6.50 percent) or one percentage point higher (8.50 percent) than the current rate:

	June 30, 2015			June 30, 2014		
	Current			Current		
	1% Decrease (6.50%)	Discount Rate (7.50%)	1% Increase (8.50%)	1% Decrease (6.50%)	Discount Rate (7.50%)	1% Increase (8.50%)
Net pension liability (asset)	\$ (10,422,698)	\$ (34,896,079)	\$ (56,190,936)	\$ (18,445,699)	\$ (42,681,532)	\$ (63,753,047)

(6) **Federal Income Tax Status**

Pursuant to a determination by the Internal Revenue Service, the Plan is qualified under the Internal Revenue Code of 1986, as amended, and therefore, is exempt from federal income taxes. The latest determination letter is dated October 28, 2014 and was a favorable determination for the Uniform Retirement System for Justices and Judges. The Plan has been amended since receiving the determination letter; however, the Plan administrator believes that the Plan is designed and is currently being operated in substantial compliance with the applicable requirements of the Internal Revenue Code and retains its status as a qualified plan.

(7) **New Accounting Pronouncements Issued, Not Yet Adopted**

In February 2015, GASB issued Statement No. 72, *Fair Value Measurement and Application* (GASB 72). GASB 72 addresses accounting and financial reporting issues related to fair value measurements. The definition of fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. GASB 72 provides guidance for determining a fair value measurement for financial reporting purposes. GASB 72 also provides guidance for applying fair value to certain investments and disclosures related to all fair value measurements. The requirements of GASB 72 will enhance comparability of financial statements among governments by requiring measurement of certain assets and liabilities at fair value using a consistent and more detailed definition of fair value and accepted valuation techniques. GASB 72 also will enhance fair value application guidance and related disclosures in order to provide information to financial statement users about the impact of fair value measurements on a government’s financial position. GASB 72 is effective for financial statements for periods beginning after June 15, 2015.

GASB Statement No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not Within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68* (GASB No. 73): GASB No. 73 was issued June 2015 and will be effective for the Plan beginning with its fiscal year ending June 30, 2016—except those provisions that address employers and governmental nonemployer contributing entities for pensions that are not within the scope of Statement No. 68, which are effective for the Plan beginning with its fiscal

Notes to Financial Statements (continued)

year ending June 30, 2017. The Statement establishes requirements for pensions not covered by Statement Nos. 67 and 68 which are essentially the same requirements as Statement No. 68. However, the lack of a pension plan that is administered through a trust that meets specified criteria is reflected in the measurements.

GASB Statement No. 76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments* (GASB No. 76): The objective of GASB No. 76 is to identify—in the context of the current governmental financial reporting environment—the hierarchy of generally accepted accounting principles (GAAP). The “GAAP hierarchy” consists of the sources of accounting principles used to prepare financial statements of state and local governmental entities in conformity with GAAP and the framework for selecting those principles. This Statement reduces the GAAP hierarchy to two categories of authoritative GAAP and addresses the use of authoritative and nonauthoritative literature in the event that the accounting treatment for a transaction or other event is not specified within a source of authoritative GAAP. This Statement supersedes Statement No. 55, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*. The requirements of this Statement are effective for financial statements for periods beginning after June 15, 2015, and should be applied retroactively. Earlier application is permitted.

The Plan is currently evaluating the effects the above GASB Pronouncements will have on its financial statements.

SETTING WELL-DEFINED FINANCIAL AND RETIREMENT GOALS

Most people have goals they want to achieve, but few have a plan to realize them. Whether the goal is getting out of debt or being able to retire comfortably, we must set clear financial objectives at every step along our path. Unfortunately, most of these objectives are vague, with little or no strategic plan. Without a plan, it can feel like we are drifting aimlessly, and not toward the future we envision for ourselves.

Navigating the path from early career to retirement may seem daunting, but creating a financial plan with well-defined intermediate steps will determine our level of success or failure.

Uniform Retirement System for Justices & Judges
 Administered By The Oklahoma Public Employees Retirement System

Investment Consultant’s Report

Investment Objectives

The primary financial objective for Uniform Retirement System for Justices and Judges (URSJJ) is to earn a long-term return sufficient to avoid deterioration in funded status. The System’s actuary estimates this return requirement to be 7.5% while its investment consultant estimates the real return requirement to be 5.5% for the fiscal year ended June 30, 2015.

The secondary goals for URSJJ are to outperform the asset allocation-weighted benchmark and target a median ranking in the universe of large public pension funds.

Asset Allocation

The System’s Investment Philosophy stresses the following key points:

1. Asset allocation is the key determinant of return. Therefore, commitments to asset allocation targets are maintained through a disciplined rebalancing program.
2. Diversification, both by and within asset classes, is the primary tool for risk control.
3. Passive instruments (index funds) are suitable strategies in highly efficient markets.

ASSET CLASS	6/30/15 ALLOCATION	LOW	TARGET	HIGH	% PASSIVE OR SEMI-PASSIVE
U.S. EQUITY	45.7%	38.2%	44.0%	49.9%	100.0%
FIXED INCOME	30.6%	27.5%	32.0%	36.5%	59.4%

Investment Consultant's Report (continued)

Review of Fiscal 2015 Investment Environment

After several years of strong capital market returns, fiscal year 2015 ended June 30 was a period marked by more modest, yet still positive returns for U.S. pension plans. The fiscal year saw mixed results within the capital markets with gains in U.S. equities but losses in Non-U.S. stock markets. The U.S. entered its sixth year of a bull market fueled by quantitative easing and extremely low interest rates. The U.S. Fixed Income market ended the fiscal year with a muted but positive return as yields ended the year slightly lower than the year before, though rates appear to be set to rise and the word "patient" disappeared from the Fed's messaging. Weaker growth in Europe, including an ailing Greek economy, and commodity and China-related fears in the emerging markets resulted in negative returns outside of the U.S. The Euro fell significantly versus the U.S. dollar over the fiscal year, and the ECB started its own quantitative easing policy through purchases of sovereign debt during the first quarter of 2015. China's local equity market dropped precipitously during June of 2015 after a period of significant appreciation, calling into question not just China's economic health but growth prospects globally. OPEC's decision not to cut oil production in November 2014, with the resulting halving of oil prices, caused its own ripple effect across U.S. and non-U.S. markets.

The broad U.S. Equity market, as measured by the Russell 3000 Index, returned 7.3% during fiscal year 2015. The large cap component of U.S. Equity (Russell 1000) gained 7.4%, while the small cap component (Russell 2000) rose slightly less at 6.5%. International equity investments had a tougher fiscal year in both the developed and emerging markets. The developed markets index (MSCI EAFE) lost 4.2% over the fiscal year, while emerging markets (MSCI Emerging Markets), lost 5.1%. U.S. Investment Grade Bonds (Barclays Aggregate), while in positive territory, advanced a modest 1.9% over the year, effectively earning their coupon as the market became wary of impending rate hikes.

As a diversified investor, Uniform Retirement System for Justices and Judges (URSJJ) experienced a +2.8% return for the fiscal year ended June 30. This result matched URSJJ's policy benchmark of +2.8% for the period.

Performance Review

At quarterly intervals, the System reviews performance at the total fund, asset class and individual manager levels. At each level, returns are evaluated versus appropriate indexes and peers. Index comparisons have as return objectives various after-fee return premiums with risk (standard deviation) not exceeding 125%-150% of the underlying index. URSJJ targets a median return within peer comparisons over longer periods of time.

Investment returns achieved through June 30, 2015 have been calculated using a time-weighted rate of return methodology based upon market values. As shown in the following table, for the 1, 3 and 5-year annualized time periods ended June 30, 2015 the U.S. Equity asset class, with its passive implementation, essentially matched the return of its respective blended benchmark. The Non-U.S. Equity asset class, which also is implemented using passive managers, slightly lagged its benchmark for the 1, 3 and 5-year annualized time periods ended June 30, 2015. The Fixed Income asset class performed above its respective blended benchmark for the 1, 3 and 5-year annualized time periods ended June 30, 2015.

The Domestic Equity asset class was ranked slightly above median in its peer universe for 1 and 5-years ended June 30, and was ranked slightly below median for the 3-year annualized time period ended June 30. The Non-U.S. Equity asset class was ranked below median in its universe for the 1, 3 and 5-years annualized time periods. The System's passive exposure to non-U.S., while cost effective, ranked poorly compared to the universe of

Investment Consultant's Report (continued)

active international managers. The Fixed Income asset class was ranked above median for the 1-year period and below median for the annualized time periods of 3 and 5-years compared to its universe.

The total URSJJ Plan matched its Policy Benchmark for the 1-year period ended June 30, 2015 and performed modestly above its Policy Benchmark for the annualized time periods of 3 and 5-years ended June 30. The ranking for the total URSJJ Plan was slightly below median for the 1-year period and slightly above median for 3 and 5-years ended June 30, 2015 compared to the peer universe of Public Funds greater than \$1 Billion.

PERIODS ENDED 6/30/15	ONE YEAR	THREE YEARS	FIVE YEARS
Domestic Equity	+7.4%	+17.8%	+17.5%
<i>86.4% Russell 1000 / 13.6% Russell 2000</i>	+7.3%	+17.8%	+17.6%
Rank*	48	51	46
Non-U.S. Equity	-5.0%	+9.7%	+8.0%
<i>MSCI ACWI ex-U.S.</i>	-4.8%	+9.9%	+8.2%
Rank*	83	76	77
Fixed Income	+2.4%	+2.1%	+4.5%

<i>TIPS</i>	19	76	59
Rank*			
Total Fund	+2.8%	+10.5%	+10.8%
<i>Policy Benchmark**</i>	+2.8%	+10.2%	+10.6%
<i>Public Fund > \$1 Billion Median*</i>	+3.2%	+10.2%	+10.3%
Rank*	61	45	40

* Ranking 1 is best, 100 is worst. Rankings source is InvestorForce.

** Policy Benchmark is: 44% (86.4% Russell 1000/ 13.6% Russell 2000) Custom Domestic Equity Benchmark/ 32% (78% BC U.S. Aggregate / 11% Citi 20-Year+ Treasury / 11% BC US TIPS) Custom Fixed Income Benchmark / 24% MS ACWI ex-U.S..

In summary, SIS believes that URSJJ is managed in a prudent and extremely cost effective manner though the extensive use of passive management and fee benefits from its association with OPERS. The sound and disciplined policies implemented by URSJJ are evidenced by its competitive performance compared to relevant benchmarks over longer time periods.

Yours truly,

Margaret S. Jadallah
Managing Director

405.848.5946 fax

Dear Members:

The Fund's total return for fiscal year 2015 was lower than had been experienced in the past several fiscal years. Equity markets in the U.S. posted respectable gains, however, returns from markets outside the U.S. detracted from the Fund's overall results when converted into U.S. dollars. We endeavor to build a durable portfolio that will weather tumultuous market conditions. Maintaining diversification among asset classes and geographical regions is a critical component of that effort. We also de-emphasize active management in the portfolio, as demonstrated by our large holdings of index-related funds. This year's letter, which covers the 2015 fiscal year, will follow the same format as in years past. First, I will discuss the general economic environment and the performance of various markets throughout the fiscal year. Next, I will focus on the Fund by reviewing the investment performance and the asset allocation. Then, I will offer an investment outlook and discuss recent events at the Fund. Finally, I will review the Fund's investment philosophy and guiding principles, because both are critically important to the investment decision-making process.

Economic Environment

GDP growth in the U.S. showed reasonably good momentum during the fiscal year, and particular strength when compared to the rest of the developed world. The second estimate of GDP growth for the second quarter of 2015 was revised up from the initial estimate, to an annual rate of 3.7%. Spending by consumers, businesses, and state and local governments contributed to the relatively strong reading for the period. Consumers benefited from an improved unemployment picture and a steep drop in commodity prices, especially oil. Oil fell from over \$100 per barrel at the beginning of the fiscal year to just over \$40 per barrel at the end of the fiscal year. This led to an increase in discretionary income for consumers, who took advantage by increasing spending in other areas. True to form in economics, there was a flip side to the coin, as the precipitous drop in the price of oil had a negative impact on the tax revenues of our state. The U.S. dollar continued to strengthen versus much of the rest of the developed world's currencies, as demand for dollars was spurred by weaker economic activity abroad and the possibility of higher interest rates domestically. A strong dollar puts pressure on the prospective growth of the economy as it causes exports to become less competitive abroad and directly reduces corporate profits derived outside of the U.S. The market generally expects the Federal Reserve to begin raising rates in the near future, however, weakness in the rest of the world will likely delay that action.

The European Union continued to struggle with weakness in its economic recovery during the fiscal year. GDP growth for the Eurozone was just 0.3% for the second quarter of 2015. The Eurozone has yet to break through a 0.4% quarter-over-quarter growth rate since its double-dip recession ended in early 2013. The European Central Bank announced plans to enhance its quantitative easing policy. Quantitative easing is a mechanism that central banks may use to stimulate activity. Outside of Europe, economic activity was worse. In Asia, Japan's GDP shrank at a 1.6% annual pace for the second quarter, as consumers closed their wallets and exports declined. In China, the official target for GDP growth was lowered from 7.4% to 7.3%. The market fears the Chinese economy is in more serious trouble, because the government has taken aggressive actions like the surprise devaluation of the yuan, propping up the stock market by purchasing stocks, and cutting interest rates.

Chief Investment Officer’s Report

U.S. and Global Stock Markets

The performance of the U.S. stock market, as measured by the Russell 3000 Index, continued its upward trajectory during the fiscal year. The Russell 3000 Index is one of the broadest equity indices available and a good proxy for the U.S. equity market as a whole. The market shrugged off concerns about European growth and a sell-off in energy stocks early in the fiscal year to earn a respectable return for the period.

Change in the Russell 3000 Index during the fiscal year ended June 30, 2015

Value at 6/30/15 6063.1

Value at 6/30/14 5650.9

Source: Frank Russell Company

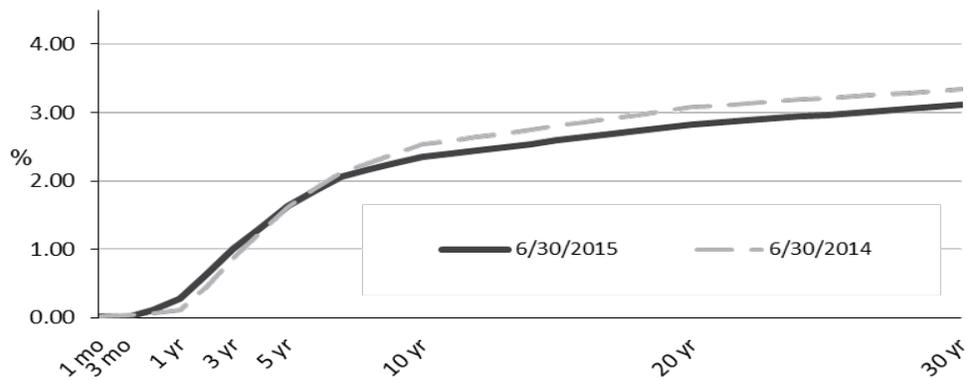

The Russell 3000 Index ended the fiscal year up 7.3%. The market rallied for most of the year, with only a couple of brief pauses. The market was driven by steady economic activity despite the withdrawal of the stimulative policies of the Federal Reserve. Commodities, especially oil, sold off dramatically over the period as concern rose that the global economy was slowing. The stocks of energy companies were particularly hard hit, with the energy sector down over 24% during the period. Leading the equity markets were the stocks of the largest companies, as large capitalization stocks outperformed small capitalization stocks by almost 1% over the period. The U.S. stock market gains were in contrast to the rest of the global developed markets on a US dollar basis. The MSCI All Country World Index ex-U.S. (ACWI ex-U.S. Index), which includes developed and emerging markets, lost 4.85% in U.S. dollar terms for the fiscal year. The U.S. dollar strengthened sharply relative to many other foreign currencies, which dramatically detracted from U.S. dollar investor returns in foreign markets. Emerging market returns in U.S. dollar terms were even weaker compared to developed markets, as investors fled the sector on an apparent larger than expected slowdown in China.

Interest Rates

The chart on the next page depicts the U.S. Treasury term structure of interest rates. The yield curve is a graphical representation of yield levels across the spectrum of bond maturities. As shown, the interest rate yield curve slightly flattened during the period as rates at the long end of the curve declined modestly and increased in the short end of the curve. The Federal Reserve has withdrawn much of the support it lent to markets for the last several years, like quantitative easing, as the economy continued to recover and economic activity grew. While the Federal Reserve has kept the Federal Funds rate exceedingly low for a long time, it has signaled the potential to raise it in the near future. The timing of this hike in interest rates will depend on economic conditions and the outlook. The bond market reacted to geopolitical risks and demanded the safety of U.S. Treasury bonds, driving down the yield for those securities on the long end of the curve. The Federal Reserve is balancing “normalizing” interest rate levels in the U.S. with weaker than expected conditions in the global economy.

Chief Investment Officer's Report

Investment Performance

Bull market continued...although showing signs of volatility

The Fund produced a total return of 2.77% for the period. The Fund performed in-line with the policy benchmark portfolio for the period. While most of the Fund follows a passive management style, the contribution from active management was accretive to overall results. Active management is used in the fixed income asset class, but not in the domestic or international equity portfolios.

The Fund benefited from positive absolute returns from several asset classes in which it is invested, but especially within the U.S. equity segment. This segment of the portfolio was the biggest positive driver of returns for the fiscal year. Overall, that segment of the portfolio returned 7.4%. The fixed income segment of the portfolio produced modest but still positive results, returning 2.4% for the period. The non-U.S. equity portfolio detracted from total returns of the fund, as that segment lost 5.0% in U.S. dollar terms for the period.

U.S. Equity

The Fund uses passive index investment management for the entire U.S. equity portfolio. Passive investment management is an efficient and cost effective way to manage the assets, while maintaining broad exposure to the desired asset class. The Fund's allocation dedicated to large capitalization stocks was again the best performing asset class for the period, returning 7.4%. The small capitalization portion of the fund returned 6.7% for the year. The overall U.S. equity portfolio returned over 7.4% for the period.

Non-U.S. Equity

This portion of the Fund is also managed entirely in a passive style. The index consists of stocks from developed and emerging countries outside of the United States. International developed markets generally performed well during the year on a local currency basis. However, the U.S. dollar strengthened relative to the basket of non-U.S. currencies, which detracted from performance results for dollar-based investors. The international portfolio lost 5.0% for the period on a U.S. dollar basis.

Fixed Income

The Fund's bond portfolio contributed positively to overall results for the fiscal year. Yields declined modestly on longer maturity bonds, which helped to boost overall nominal bond total returns. The interest-rate sensitive portion of the fixed income segment produced the highest returns (nominal and benchmark-relative) within this segment, as we would expect given the decline in long-term U.S. Treasury yields over the period. In addition, the active manager's bias towards long term bonds also boosted returns relative to its benchmark. The fixed income managers benchmarked to the broad fixed income market both outperformed the index. As with last fiscal year, the more risk one assumed, the more return was earned. The Fund's core plus mandate, which uses higher yielding bonds in the asset mix, performed better relative to the benchmark than the more constrained core bond mandate.

Chief Investment Officer's Report

Asset Allocation

Diversification Reduces Volatility

Diversification continues to be the most effective defense against the risks associated with any one individual security or asset class. Risks are controlled by allocating the Fund's assets across various asset classes and sectors within asset classes.

Asset Class	Min	6/30/2015	Target	Max
Cash	0.0%	0.3%	0.0%	0.0%
Domestic Fixed Income	27.5%	30.6%	32.0%	36.5%
U.S. Equity	38.2%	45.7%	44.0%	49.8%
Non-U.S. Equity	21.0%	23.4%	24.0%	27.0%
Total Fund		100%	100%	

Outlook and Recent Events

Outlook

If you've read this report in previous years, you know that I usually start this section on a cautionary note regarding the accuracy of forecasted market returns. Correctly and consistently forecasting the market's behavior is impossible, and taking any forecast as fact is sheer folly. We build the Fund according to the tenets set forth in our Investment Policy while making diversification, with respect to different asset classes and within each asset class, a priority. We endeavor to structure the Fund so it may benefit from strong returns in relatively riskier asset classes, but are ever mindful to maintain a level of diversification to dampen the return volatility that can result.

The current global economic environment continues to be driven by economic activity in North America, and specifically the U.S. European economies appear to be on firmer footing than in prior periods, but growth is fragile and the recovery is uneven among the EU member states. The European Central Bank continues to support capital markets with programs designed to inject liquidity into markets. Economic activity in China appears to be slowing, which has equity investors fearful around the globe. This slowdown has also impacted other markets. The sell-off in commodities, especially oil, has impacted the local economy negatively. The Federal Reserve has seemingly done a good job of managing expectations of an interest rate increase. However, the bond market in the U.S. has signaled that it expects rates to necessarily stay lower for a longer period than previously expected, due to economic weakness and uncertainty in the rest of the world.

For 2016, our largest concern continues to be the prospect of generating and maintaining investment results that match or exceed the actuarial assumed rate of return of 7.5%. This will continue to be a challenging task going forward. Interest rates still remain near historically low levels which continue to pressure the long-term return generating capacity of a diversified portfolio. Additionally, after such a strong run, equity market valuation levels continue to look stretched, which reduces prospective returns in the equity markets.

Fixed Income

Over a long period of time, the total return of the bond market **tends** to resemble the yield of years past. Over short periods, interest rate movements may have a profound impact on the capital gains (or losses) experienced by bond investors. The more quickly interest rates rise, the more pressure is exerted on the total return of the fixed income portfolio. Rates declined on the long end of the yield curve last year, which helped bolster fixed income total returns over the period. Our medium-term expectation for the total return of the U.S. fixed income markets going forward would more closely reflect current yields, which are around 2.25%-2.50%. But we could see a much lower total return (even a negative year) if rates rise too quickly and the decline in bond value more than offsets the yield earned over the period.

Chief Investment Officer's Report

Equity

The equity markets are particularly difficult to predict with any type of precision. Over short periods of time, market sentiment and technical factors (buying and selling) have an overwhelming impact on returns experienced by investors. **Over a long period of time**, the real return from the equity markets can be attributable to three main sources: dividends on stocks, the growth rate of corporate earnings, and changes in the valuation ratios. Generally, the growth rate of earnings depends on the economic environment. My forward-looking expectation on the economy has changed a little from last year. The U.S. economy continues to show modest but stable growth. Consumer spending, the biggest driver of the U.S. economy, remains stable, as the outlook for employment continues to improve and consumers have more discretionary dollars to spend due to the reduction in commodity prices. The ability of the policy makers to manage expectations around monetary policy continues to be the key, in my opinion, to the performance of the equity market (and most other "risk assets") for the next several quarters, in addition to the reaction of market participants to elevated valuation levels. What has changed from last year is the outlook for other large economies, like China. Uncertainty is increasing around economic growth prospects in Asia, which could increase the volatility of returns observed in global risk markets.

Recent Events

There were no changes to the structure of the portfolio or to the underlying advisors to the Fund during the fiscal year.

Investment Philosophy and Guiding Principles

The investment philosophy and the principles that guide the stewardship of the Fund have remained consistent and are listed below. A pension fund has the longest of investment horizons and, therefore, rightly focuses on factors impacting long-term results:

- Asset allocation is the key factor determining long-term results.
- Disciplined rebalancing toward the desired asset allocation maintains diversification and controls risk.
- Diversification within and across asset classes is the most effective tool for controlling risk.
- Passive investment management is commonly the most effective approach in efficient markets; active investment management can succeed in less efficient markets.

For a complete discussion of the investment portfolio and policies thereof, please see the Statement of Investment Policy. A copy of the policy is posted on the OPERS website, www.OPERS.OK.gov/Investment. If you have any questions about this report or the management of the Fund's investments, please contact me. Thank you.

Regards,

Brad Tillberg, CFA
Chief Investment Officer

Largest Holdings

The Plan's ten largest fixed income at June 30, 2015, are described in the following schedules. The Plan invests in four index funds which are separately presented.

Ten Largest Fixed Income Holdings (By Fair Value):

Security	Par	Fair Value
U.S. Treasury Bonds 2.5% due 2-15-2045	\$4,160,000	\$3,661,133
FNMA Single Family Mortgage 4% due 7-15-2045	2,695,000	2,855,299
U.S. Treasury Notes 1.625% due 6-30-2020	2,685,000	2,684,791
U.S. Treasury Bonds 2.75% due 11-15-2042	2,698,000	2,509,982
U.S. Treasury Bonds 2.125% due 5-15-2025	1,940,000	1,904,838
U.S. Treasury Bonds 2.125% due 6-30-2022	1,755,000	1,762,404
U.S. Treasury Bonds 3% due 11-15-2044	1,550,000	1,516,215
U.S. Treasury Bonds 3% due 5-15-2045	1,545,000	1,514,100
U.S. Treasury Notes .625% due 5-31-2017	1,460,000	1,459,772
U.S. Treasury Bonds 1.875% due 5-31-2022	1,370,000	1,354,801

Investments in Funds (By Fair Value):

Cash Equivalents		3,303	
Investments		321,696	
Total Investments and Cash Equivalents		\$ 324,999	

* Manager fair values include their respective cash and cash equivalents.

Asset Comparison

A comparison of the actual investment distribution at June 30, 2015 and 2014, based on the net investment manager holdings, including accrued income, payables and receivables, compared to the target allocations for each year is as follows:

FOUR-LEGGED CHAIR AS A MODEL FOR INCOME REPLACEMENT

Income in retirement is not as straight forward as income during your working years. The retirement industry uses the “four-legged” chair to illustrate the different revenue streams a member needs in retirement. Each leg of the chair represents one of these sources of income: Social Security, employer-sponsored retirement plans like the URSJJ, personal savings, and even working in retirement.

The URSJJ not only takes great care to educate members about the plan they participate in, but also how this plan will work in conjunction with the other sources of income they may have available in retirement.

Just like a chair will not support you with only one leg, no single source of income will likely support a person in retirement. Most retirees will require all of these sources of income to have a successful and balanced retirement.

Board of Trustees
Oklahoma Public Employees Retirement System
5801 N. Broadway Extension, Suite 400
P.O. Box 53007
Oklahoma City, OK 73152-3007

Members of the Board:

We have completed an actuarial valuation of the Oklahoma Uniform Retirement System for Justices and Judges as of July 1, 2015 for the purpose of determining the actuarial contribution rate and calculating and analyzing key financial measurements. Actuarial valuations are performed annually. This valuation reflects the benefit provisions and contribution rates in effect as of July 1, 2015.

In preparing the valuation, we, as the actuary, relied on the data provided by the System. As part of our work, we performed a limited review of the data for consistency and reasonableness and did not find material defects in the data.

All of the information and supporting schedules in the Actuarial Section have been provided by Cavanaugh Macdonald Consulting, LLC. We also prepared the *Schedule of Changes in the Net Pension Liability*, *Schedule of the Net Pension Liability* and *Schedule of Employer Contributions* shown in the financial section of the Comprehensive Annual Financial Report. All historical information that references a valuation date prior to July 1, 2010 was prepared by the prior actuarial firm.

The assumptions recommended by the actuary and adopted by the Board are, in the aggregate, reasonably related to the experience under the System and to reasonable expectations of anticipated experience under the System and meet the parameters for the disclosures under statements issued by the Governmental Accounting Standards Board.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period

or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

This is to certify that the independent consulting actuaries, Alisa Bennett and Brent Banister, are Members of the American Academy of Actuaries and meet the qualification standards of the American Academy of Actuaries to render the actuarial opinion contained herein. They have experience in performing valuations for public retirement systems. The valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board. The actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the System.

Respectfully submitted,

Alisa Bennett, FSA, EA, FCA, MAAA
Principal and Consulting Actuary

Brent Banister, PhD, FSA, EA, FCA, MAAA
Chief Pension Actuary

Summary of Results

	7/1/2015 Valuation	7/1/2014 Valuation	% Change

Less Statutory State Employer contribution Rate	17.50%	16.00%	
Contribution Shortfall/(Surplus)	(7.49%)	(1.71%)	

Analysis of Financial Experience

Gains & Losses in Actuarial Accrued Liability During the Year Ended June 30, 2015 Resulting from Differences Between Assumed Experience & Actual Experience

Type of Activity	(Gain) or Loss for Year End 2014
1. Age & Service Retirements. If members retire at older ages or with smaller benefits than assumed, there is a gain. If they retire at younger ages or have higher average pays, a loss occurs.	\$ 694,000
2. Disability Retirements. If disability claims are less than assumed, then there is a gain. If more claims, a loss.	\$ (151,000)
3. Death Benefits. If survivor claims are less than assumed, there is a gain. If more claims, there is a loss.	1,440,000
4. Withdrawal from Employment. If more liabilities are released by withdrawals than assumed, there is a gain. If smaller releases, a loss.	(765,000)
5. Pay Increases. If there are smaller pay increase than assumed, there is a gain. If greater increases, a loss.	(3,105,000)
6. New Entrants. All new entrants to the System create a loss.	109,000
7. Other. Miscellaneous gains and losses resulting from data adjustments, employee transfers, valuation methods, etc.	(2,820,000)
8. (Gain) or Loss During Year From Financial Experience.	(9,383,000)
9. Composite (Gain) or Loss During Year.	\$(13,981,000)

Solvency Test

The Judges funding objective is to be able to pay long-term benefit promises through contributions that remain approximately level from year to year as a percent of salaries earned by members. In this way, members and employers in each year pay their fair share for retirement service accrued in that year by System members.

If the retirement system follows level contribution rate financing principles, the system will pay all promised benefits when due – the ultimate test of financial soundness.

A short-term solvency test is one means of checking the funding progress. In a short-term solvency test, the retirement System’s present valuation assets are compared with: 1) active member contributions on deposit, 2) the liabilities for future benefits to persons who have retired and the liabilities for terminated employees with vested benefits, and 3) the liabilities for service already rendered by active members. In a system that has been following the discipline of level contribution rate financing, the liabilities for member contributions on deposit (liability 1), the liabilities for future benefits to present retirees and the liabilities for future benefits for terminated employees (liability 2) will be fully covered by present assets, except in rare circumstances.

In addition, the liabilities for service already rendered by members (liability 3) will be partially covered by the remainder of present assets. Generally, if the system has been using level contribution rate financing, the funded portion of liability 3 will increase over time; however, a decrease generally occurs in those years when substantial benefit improvements are granted by the Legislature. It is unusual for liability 3 to be fully funded. The funded ratio of the System based on total actuarial accrued liabilities (1 + 2 + 3) provides an indication of how well the System is funded.

The schedule below illustrates the progress of funding the actuarial accrued liabilities.

Date	Actuarial Accrued Liabilities ¹ and Valuation Assets					Portion of Actuarial Accrued Liabilities Covered by Reported Assets			Funded Ratio of Total Accrued Actuarial Liabilities
	Active Member Contributions (Liability 1)	Retirees, Beneficiaries and Terminated Vested Members (Liability 2)	Employer Financed Portion of Active Members (Liability 3)	Total Liability (1 + 2 + 3)	Reported Assets ¹	(1)	(2)	(3)	
July 1, 2006	\$16,672,133	\$ 90,877,534	\$ 97,755,381	\$205,305,048	\$210,376,209	100%	100%	100.0%	102.5%

Summary of System Provisions

<i>Employees Included:</i>	All Justices and Judges of the Supreme Court, Court of Criminal Appeals, Workers Compensation Court, Courts of Appeals or District Court who serve in the State of Oklahoma participate in the Uniform Retirement System for Justices and Judges.
<i>System Contributions:</i>	The contributions are received from the employer agencies based on a percentage of salary of covered members. Effective for the fiscal year ending June 30, 2006, employer contributions increased to 3.0% of the member's salary and will increase annually up to 22.0% of member payroll for fiscal years ending June 30, 2019, and thereafter.
<i>Member Contributions:</i>	Before September 1, 2005, basic member contributions equal 5% of salary, while married members could have elected an 8% contribution rate in order to provide survivor coverage. After September 1, 2005, the member contribution rate for all members is 8% of salary.
<i>Final Average Salary:</i>	The average monthly salary received during the highest three (3) years of active service as a Justice or Judge in a court of record.
<i>Retirement Date:</i>	A member who completes eight (8) years of service and attains age sixty-five (65), or completes ten (10) years of service and attains age sixty (60), or completes eight (8) years of service and whose sum of years of service and age equals or exceeds eighty (80), may begin receiving retirement benefits at his request. For judges taking office after January 1, 2012, retirement age is sixty-seven (67) with eight (8) years of service or age sixty-two (62) with ten (10) years of service.
<i>Normal Retirement Benefit:</i>	General formula is 4% of average monthly salary multiplied by service, up to a maximum benefit of 100% of final average salary.
<i>Disability Benefit:</i>	After fifteen (15) years of service and age fifty-five (55), provided the member is ordered to retire by reason of disability and is eligible for disability retirement benefits. This benefit, payable for life, is calculated in the same manner as a normal retirement benefit but cannot exceed 100% of final average salary.

Summary of System Provisions (continued)

Survivor Benefit:

The spouse of a deceased active member who had met normal or vested retirement provisions may elect a spouse's benefit. The spouse's benefit is the benefit that would have been paid if the member had retired and elected the joint and 100% survivor option (Option B), or a 50% unreduced benefit for certain married participants making 8% of pay contributions prior to September 1, 2005. If the member has ten (10) years of service and the death is determined to be employment related, this benefit is payable immediately to the spouse. In order to be eligible for this survivor coverage, members must be married to their spouse for three (3) years preceding death and they must be married ninety (90) days prior to the member's termination of employment as a Justice or Judge. Effective October 1, 2004, the benefit for surviving spouses may be higher than 50% of the member's benefit, up to 65% for certain members who made additional voluntary survivor benefit contributions of 3% of salary prior to July 1, 1999, and who die or retire after July 1, 1999.

Optional Forms of Retirement Benefits:

The normal form of benefit for a single member is a single life monthly annuity with a guaranteed refund of the contribution accumulation. The normal form for a married member is a 50% joint and survivor annuity benefit. Optional forms of payment with actuarial reduction (if applicable) are available to all members retiring under the normal retirement or vested retirement provisions. After September 1, 2005, the options providing post-retirement death benefits are:

Option A -- Joint and 50% survivor annuity with a return to the unreduced amount if the joint annuitant dies.

Option B -- Joint and 100% survivor annuity with a return to the unreduced amount if the joint annuitant dies.

For married members, spousal consent is required for any option other than Option A.

Participant Death Benefit:

\$5,000 lump sum.

Supplemental Medical Insurance Premium:

The System contributes the lesser of \$105 per month or the Medicare Supplement Premium to the Oklahoma State and Education Employee's Group Health Insurance Program for members receiving retirement benefits.

Summary of Actuarial Assumptions and Methods

1. The investment return rate used in the valuation was 7.5 percent per year, net of investment expenses, compounded annually. This rate of return is not the assumed real rate of return. The real rate of return is the rate of return in excess of the inflation rate. Considering other financial assumptions, the 7.5 percent investment return rate translates to an assumed real rate of return of 4.5 percent.
2. The RP-2000 Mortality Table projected to 2010 using Scale AA for males and females with a one-year age setback is used for preretirement and postretirement mortality.
3. The probability of withdrawal from service is 2% for all years of service. The individual pay increase assumption is 5.00% per year.
4. The probabilities of retirement are shown in Schedule 1.
5. Because of the passage of House Bill 2132, benefits are not assumed to increase due to future ad hoc cost-of-living increases.
6. The individual entry-age normal actuarial cost method of valuation was used in determining actuarial accrued liability and normal cost. Actuarial gains and losses reduce or increase the unfunded actuarial accrued liability and are amortized over the remaining amortization period (12 years as of July 1, 2015).
7. The actuarial value of assets is based on a five-year moving average of expected actuarial values and market values. A preliminary expected value is determined equal to the prior year's actuarial value of assets plus net cash flow for the year ending on the valuation date, assuming the valuation investment return. The expected actuarial asset value is equal to the preliminary expected actuarial value plus the unrecognized investment gains and losses as of the beginning of the previous fiscal year. Twenty percent (20%) of the gain/loss as measured by the difference between the expected actuarial value and the market value at the valuation date is added to the preliminary expected actuarial value plus twenty percent (20%) of the unrecognized gains or losses for the four preceding fiscal years. The final result is constrained to a value no less than 80% and no more than 120% of the market value at the valuation date.
8. The actuarial assumptions and methods used in the valuation were adopted by the Board on based on System experience from July 1, 2010 through June 30, 2013.

THE IMPORTANCE OF DEBT REDUCTION

Debt is a reminder of things we have already enjoyed; the lunch from last week, the new cell phone that is no longer the newest model, or repairs on the car that is starting to act up again. Debt keeps us looking back at where we have been and what we have done, rather than looking forward to where we might go – namely successfully saving for a bright future in retirement.

Eliminating debt should be a priority, but hopefully not at the expense of retirement savings. It is possible to work toward the accomplishment of more than one financial goal. Getting out of debt and retirement savings are not mutually exclusive goals. If you wait until debt has been completely eliminated before starting to save for retirement, you miss out on many years of compounding interest and earnings.

Totals	260	195	61	3	1	23	190	14

*Type of Retirement

- Type 1 – *Normal retirement for age and service:* For participants who became members prior to January 1, 2012, eligible at (1) when the sum of the member’s age plus years of service equals 80 points and has judicial service at least 8 years, or (2) age 65 with 8 years of judicial service, or (3) age 60 with 10 years of judicial service. For participants who became members on or after January 1, 2012, they are eligible at (1) age 67 with 8 years of judicial service, or (2) age 62 with 10 years of judicial service.
- Type 2 – *Survivor payment:* Normal.
- Type 3 – *Disability:* Available for members who have attained age 55 and have 15 years of credited service determined to be disabled by the Court of the Judiciary.
- Type 4 – *Survivor payment:* Disability retirement.

Option Selected

- Option 1 – *Single-life annuity:* The maximum benefit is paid for the member’s lifetime.
- Option 2 – *50% to 65% Survivor Annuity:* Paid to surviving spouse for his or her lifetime if certain contributions were made while the justice or judge was actively participating and if other criteria are met.
- Option 3 – *Option A – ½ Joint and Survivor Annuity:* The member will receive a reduced retirement benefit for life. The reduced retirement benefit will be paid to the surviving joint annuitant for their lifetime. This option became available September 1, 2005.
- Option 4 – *Option B – 100% Joint and Survivor Annuity:* A reduced benefit is paid to the member for life and the remaining benefit is paid to a surviving joint annuitant for their lifetime. This option became available September 1, 2005.

Deferred Members

At June 30, 2015, there are 18 former members with deferred future benefits.
