

Help Manage Market Risk by Diversifying Your Investments

Finding an investment mix that may be right for you

Investing in a variety of funds is important to the overall health of your portfolio. One of the biggest factors in determining your approach to investing is getting an idea of how comfortable you are with risk.

Understanding your risk tolerance

Circle the number that represents how much you agree or disagree with each of the following statements.

1. I am a knowledgeable investor who understands the trade-off between risk and return. I am willing to accept more risk in exchange for potentially higher returns.

Disagree **1** **2** **3** **4** **5** **Agree**

2. If one of my investments dropped 20% in value over six months due to a stock market fluctuation, I would keep that investment, expecting it to recover its value.

Disagree **1** **2** **3** **4** **5** **Agree**

3. I have savings other than SoonerSave that make me feel comfortable about my financial future.

Disagree **1** **2** **3** **4** **5** **Agree**

Now add up the numbers you circled above to get your risk tolerance score: _____

Find your score below to help determine your approach

Investment time horizon	Tolerance score				
0-5 years	3	4	6	7	≥9
6-10 years	≤5	6	7	9	≥10
11-15 years	≤6	8	9	10	≥12
16-20 years	≤8	9	11	12	≥13
21+ years	≤9	11	12	14	15

Conservative	Moderate	Aggressive
--------------	----------	------------

INVESTOR TYPES

Conservative

You are comfortable with safety and stability. The illustration above is an example of a **conservative** mix of assets.

Moderate

You are comfortable with some volatility. This mix is a balance between lower- and higher-risk investments. The illustration above is an example of a **moderate** mix of assets.

Aggressive

You are comfortable with higher risk for potentially higher returns. The illustration above is an example of an **aggressive** mix of assets.

■ International ■ Bonds ■ Stable Value ■ Small-Cap Stocks ■ Large-Cap Stocks

FOR ILLUSTRATIVE PURPOSES ONLY. Intended to illustrate possible investment portfolio allocations that represent an investment strategy based on risk and return. This is not intended as financial planning or investment advice.

Risk/Reward

Measuring the amount of risk you want to take while remaining comfortable with your investments is very important and can vary as your situation changes or as you approach retirement.

Consider reviewing your investment strategy at least annually to ensure it is still appropriate for your goals and, if necessary, rebalance your asset allocation.¹ Rebalancing your account adjusts the balance of your investment options back to your original target asset allocation mix. You can rebalance investments on your Plan website at www.soonersave.com.¹
