

**OKLAHOMA**

# **UNIFORM RETIREMENT SYSTEM FOR JUSTICES & JUDGES**

## **GASB STATEMENT NO. 68 REPORT**

---

**PREPARED FOR JUNE 30, 2024  
MEASUREMENT DATE**

November 11, 2024

Mr. Joseph Fox  
Executive Director  
Oklahoma Public Employees Retirement System  
5400 N. Grand Boulevard, Suite 400  
Oklahoma City, OK 73112

Dear Mr. Fox:

Presented in this report is information to assist the Uniform Retirement System for Justices and Judges in providing information required under the Governmental Accounting Standards Board (GASB) Statement No. 68 to participating employers. GASB Statement No. 68 establishes accounting and financial reporting requirements for governmental employers who provide pension benefits to their employees through a trust. This report has been prepared as of June 30, 2024. The calculations in this report have been made on a basis that is consistent with our understanding of this accounting standard (GASB 68).

The annual actuarial valuation used as the basis for much of the information presented in this report was performed as of July 1, 2024. The valuation was based upon data, furnished by the Uniform Retirement System for Justices and Judges' staff, concerning active, inactive and retired members along with pertinent financial information. This information was reviewed for completeness and internal consistency, but was not audited by us. The valuation results depend on the integrity of the data. If any of the information is inaccurate or incomplete, our results may be different and our calculations may need to be revised. Please see the actuarial valuation for additional details on the funding requirements for the System including actuarial assumptions and methods and the Plan's funding policy.

To the best of our knowledge, the information contained in this report is complete and accurate. The calculations were performed by qualified actuaries according to generally accepted actuarial principles and practices, as well as in conformity with Actuarial Standards of Practice issued by the Actuarial Standards Board. In order to prepare the results in this report, we have utilized actuarial models that were developed to measure liabilities and develop actuarial costs. These models include tools that we have produced and tested, along with commercially available valuation software that we have reviewed to confirm the appropriateness and accuracy of the output. In utilizing these models, we develop and use input parameters and assumptions about

future contingent events along with recognized actuarial approaches to develop the needed results. The calculations are based on the current provisions of the System, and on actuarial assumptions that are internally consistent and individually reasonable based on the actual experience of the System. In addition, the calculations were completed in compliance with applicable law and, in our opinion, meet the requirements of GASB 68.

These results are only for financial reporting and may not be appropriate for funding purposes or other types of analysis. Calculations for purposes other than satisfying the requirements of GASB 68 may produce significantly different results. Future actuarial results may differ significantly from the current results presented in this report due to such factors as changes in plan experience or changes in economic or demographic assumptions.

We, Alisa Bennett, FSA, and Brent A. Banister, FSA, are members of the American Academy of Actuaries and meet the Qualification Standards to render the actuarial opinion contained herein. We are available to answer any questions on the material contained in this report or to provide explanations or further details as may be appropriate.

Respectfully submitted,

Alisa Bennett, FSA, EA, FCA, MAAA  
President

Brent A. Banister, PhD, FSA, EA, FCA, MAAA  
Chief Actuary

## SECTION I – SUMMARY OF PRINCIPAL RESULTS

### GASB STATEMENT NO. 68

Uniform Retirement System for Justices and Judges	
<b>Valuation Date (VD):</b>	July 1, 2024
<b>Prior Measurement Date:</b>	June 30, 2023
<b>Measurement Date (MD):</b>	June 30, 2024
<b>Membership Data:</b>	
Retirees and Beneficiaries	332
Inactive Vested Members	18
Inactive Nonvested Members	21
Active Employees	<u>272</u>
Total	643
<b>Single Equivalent Interest Rate (SEIR):</b>	
Long-Term Expected Rate of Return	6.50%
Municipal Bond Index Rate at Prior Measurement Date	3.66%
Municipal Bond Index Rate at Measurement Date	3.94%
Year in which Fiduciary Net Position is Projected to be Depleted	N/A
Single Equivalent Interest Rate at Prior Measurement Date	6.50%
Single Equivalent Interest Rate at Measurement Date	6.50%
<b>Net Pension Liability:</b>	
Total Pension Liability (TPL)	\$387,513,477
Fiduciary Net Position (FNP)	<u>409,923,456</u>
Net Pension Liability (NPL = TPL – FNP)	(\$22,409,979)
FNP as a percentage of TPL	105.78%
<b>Pension Expense:</b>	\$12,769,863
<b>Deferred Outflows of Resources:</b>	\$48,267,633
<b>Deferred Inflows of Resources:</b>	\$41,395,267

## SECTION II - INTRODUCTION

---

The Governmental Accounting Standards Board issued Statement No. 68 (GASB 68), *“Accounting and Financial Reporting for Pensions”* in June 2012. GASB 68’s effective date for employers was the first fiscal year beginning after June 15, 2014. This report, prepared as of June 30, 2024 (the Measurement Date), presents information to assist the Uniform Retirement System for Justices and Judges in providing the required information under GASB 68 to participating employers. Much of the material provided in this report, including the Net Pension Liability/(Asset), is based on the results of the GASB 67 report for the Uniform Retirement System for Justices and Judges, which was issued October 24, 2024. See that report for more information on the member data, actuarial assumptions and methods used in developing the GASB 67 results.

GASB 68 requires the inclusion of a Net Pension Liability/(Asset) (NPL) on the plan sponsor’s balance sheet and a determination of a Pension Expense (Income) (PE), which may bear little relationship to the funding requirements for the Uniform Retirement System for Justices and Judges. In fact, it is possible in some years for the NPL to be an asset or the PE to be an income item. The NPL is set equal to the Total Pension Liability (TPL) minus the Fiduciary Net Position (FNP). The benefit provisions recognized in the calculation of the TPL are summarized in Appendix B.

PE includes amounts for Service Cost (the Normal Cost under Entry Age Normal (EAN) for the year), interest on the TPL, employee contributions, administrative expenses, other cash flows during the year, recognition of increases/decreases in the TPL due to changes in the benefit structure, actual versus expected experience, actuarial assumption changes, and recognition of investment gains/losses. The actual experience and assumption change impacts are recognized over the average expected remaining service life of the System membership as of the beginning of the measurement period, while investment gains/losses are recognized equally over five years. The development of the PE is shown in Section III. The unrecognized portions of each year’s experience, assumption changes and investment gains/losses are used to develop Deferred Inflows and Outflows of Resources, which also must be included on the employer’s Statement of Net Position.

Among the items needed for the TPL calculation is a discount rate, as defined by GASB, or a Single Equivalent Interest Rate (SEIR). To determine the SEIR, the FNP must be projected into the future for as long as there are anticipated benefits payable under the plan provisions applicable to the membership and beneficiaries of the System on the Measurement Date. Future contributions were projected to be made at the current levels set in statute. If the FNP is not projected to be depleted at any point in the future, the long-term expected rate of return on plan investments expected to be used to finance the benefit payments may be used as the SEIR.

If, however, the FNP is projected to be depleted at a future measurement date, the SEIR is determined as the single rate that will generate a present value of benefit payments equal to the sum of the present value determined by discounting all projected benefit payments through the date of depletion by the long-term expected rate of return, and the present value determined by

## SECTION II - INTRODUCTION

---

discounting those benefits after the date of depletion by a 20-year tax-exempt municipal bond (rating AA/Aa or higher) rate. The rate used, if necessary, for this purpose is the monthly average of the Bond Buyers General Obligation 20-year Municipal Bond Index Rate (formerly published monthly by the Board of Governors of the Federal Reserve System) (3.94%).

Our calculations indicate that the FNP is not projected to be depleted, so the Municipal Bond Index Rate is not used in the determination of the SEIR for either the June 30, 2023 or the June 30, 2024 TPL. The SEIR for both the current Measurement Date and the Prior Measurement Date is 6.50%, the long-term assumed rate of return on investments, and meets the requirements of GASB 67 and 68.

The FNP projections are based upon the Uniform Retirement System for Justices and Judges' financial status on the Measurement Date, the indicated set of methods and assumptions, and the requirements of GASB 67 and 68. As such, the FNP projections are not reflective of the cash flows and asset accumulations that would occur on an ongoing plan basis, reflecting the impact of future members. Therefore, the results of this test do not necessarily indicate whether or not the fund will actually run out of money, the financial condition of the System, or the System's ability to make benefit payments in future years.

The sections that follow provide the results of all the required calculations, presented in the order laid out in GASB 68 for note disclosure and Required Supplementary Information (RSI).

## SECTION III – PENSION EXPENSE

As noted earlier, the collective Pension Expense (Income) (PE) consists of a number of different items. GASB 68 refers to the first as Service Cost, which is the Normal Cost using the Entry Age Normal (EAN) actuarial funding method. The second item is interest on the TPL at the long-term rate of return in effect as of the Prior Measurement Date.

The next three items refer to any changes that occurred in the TPL (i.e., actuarial accrued liability (AAL) under EAN) due to:

- benefit changes,
- actual versus expected experience, or
- changes in actuarial assumptions.

Benefit changes, which are reflected immediately, will increase PE if there is a benefit improvement for existing System members, or decrease PE if there is a benefit reduction. For the year ended June 30, 2024, there were no benefit changes to be recognized.

The next item to be recognized is the portion of current year changes in TPL due to actual versus expected experience for the year. The portion to recognize in the current year is determined by spreading the total change over the average expected remaining service life of the entire System membership at the beginning of the measurement period. The average expected remaining service life of active members is the average number of years the active members are expected to remain in covered employment. At the beginning of the measurement period, this number is 10.37. The average expected remaining service life of the inactive members is zero. Therefore, the recognition period is the weighted average of these two amounts, or 4.36 years.

The last item under changes in TPL is changes in actuarial assumptions or other inputs. There were no change in the actuarial assumptions or other inputs since the Prior Measurement Date. If there was such a change, the change would be recognized over the average expected remaining service life of the entire System membership, using the same approach applied to experience gains and losses, as described in the prior paragraph.

Member contributions for the year and projected earnings on the FNP at the long-term expected rate of return are subtracted from the amount determined thus far. One-fifth of current-period difference between projected and actual earnings on the FNP is recognized in the PE.

The current year portions of previously determined experience, assumption changes and earnings amounts, recognized as Deferred Outflows of Resources and Deferred Inflows of Resources are included next. Deferred Outflows of Resources are added to the PE, while Deferred Inflows of Resources are subtracted from the PE. Finally, administrative expenses and other miscellaneous items are included.

The calculation of the PE for the year ended June 30, 2024 is shown in the following table.

## SECTION III – PENSION EXPENSE

### Pension Expense (Income) For the Year Ended June 30, 2024

Uniform Retirement System for Justices and Judges	2024
Service Cost	\$10,977,141
Interest on the Total Pension Liability	23,733,497
Current-period Benefit Changes	0
Expensed portion of current-period difference between expected and actual experience in the total pension liability	126,763
Expensed portion of current-period changes of assumptions	0
Member Contributions	(3,133,763)
Projected Earnings on Plan Investments	(24,034,038)
Expensed portion of current-period differences between actual and projected earnings on plan investments	(4,656,694)
Administrative Expense	241,894
Other	0
Recognition of beginning deferred outflows of resources as pension expense	26,827,254
Recognition of beginning deferred inflows of resources as pension expense	(17,312,191)
<b>Total Pension Expense</b>	<b>\$12,769,863</b>

Note: Average expected remaining service life for all members is 4.36.

## SECTION IV – NOTES TO FINANCIAL STATEMENTS

The material presented herein will follow the order presented in GASB 68. Paragraph numbers are provided for ease of reference.

**Paragraph 37:** The information required is to be prepared by the System and employer.

**Paragraph 38:** The information required is to be prepared by the System and employer.

**Paragraph 39:** Not Applicable.

**Paragraph 40(a) – (b):** The information required is to be supplied by the System.

**Paragraph 40(c):** The data required regarding the membership of the System were furnished by the System. The following table summarizes the membership of the System as of July 1, 2024, the date of the valuation used to determine the June 30, 2024 Total Pension Liability.

### Membership

Number as of July 1, 2024	
Inactive Members Or Their Beneficiaries	332
Currently Receiving Benefits	
Inactive Members Entitled To But Not Yet	18
Receiving Benefits	
Nonvested Terminations	21
Active Members	272
Total	643

**Paragraph 40(d) – (e):** The information required is to be supplied by the System.

**Paragraph 41:** This paragraph requires information to be disclosed regarding the actuarial assumptions and other inputs used to measure the TPL. The complete set of actuarial assumptions and other inputs utilized in developing the TPL are outlined in Appendix C. The TPL as of June 30, 2024 was determined based on an actuarial valuation prepared as of July 1, 2024, using the following actuarial assumptions and other inputs:

Price Inflation	2.50 percent
Salary increases, including price inflation	3.50 percent
Long-term Rate of Return, net of investment expense, including price inflation	6.50 percent

## SECTION IV – NOTES TO FINANCIAL STATEMENTS

Municipal Bond Index Rate	
Prior Measurement Date	3.66 percent
Measurement Date	3.94 percent

Year FNP is projected to be depleted N/A

Single Equivalent Interest Rate, net of plan investment expense, including price inflation	
Prior Measurement Date	6.50 percent
Measurement Date	6.50 percent

Mortality Pub-2010 Below Median, General Membership Active/Retiree Healthy Mortality Table with base rates projected generationally using Scale MP-2019. Male rates are set back two years, and female rates are unadjusted.

Disability mortality rates were based on the post-retirement mortality rates with rates set forward 12 years.

The actuarial assumptions used in the valuation are based on the results of the most recent actuarial experience study, which covered the three-year period ending June 30, 2022. The experience study report is dated April 12, 2023.

### Paragraph 42:

**(a): Discount rate (SEIR).** The discount rate used to measure the TPL at June 30, 2024 was 6.50%. There was no change in the SEIR since the Prior Measurement Date.

**(b): Projected cash flows.** The projection of cash flows used to determine the discount rate assumed that plan contributions from members and the State of Oklahoma will be made at the current contribution rates as set out in state statute:

- a. Employee contribution rate: 8.00%
- b. State contribution rate: 22.00%
- c. Administrative expenses in the prior year were projected forward with price inflation as an estimate for administrative expenses in current and future years. The portion of expenses in future years allocated to the current members was based on the proportionate share of covered payroll in each year for the remainder of the existing members to the total covered payroll for all members.
- d. Both pension and OPEB benefits are paid by the trust as a whole.

## SECTION IV – NOTES TO FINANCIAL STATEMENTS

Based on those assumptions, the System's FNP was projected to be available to make all projected future benefit payments of current System members. Therefore, the long-term expected rate of return on System investments of 6.50% was applied to all periods of projected benefit payments to determine the TPL.

The FNP projections are based upon the System's financial status on the Measurement Date, the indicated set of methods and assumptions, and the requirements of GASB 67 and 68. As such, the FNP projections are not reflective of the cash flows and asset accumulations that would occur on an ongoing System basis, reflecting the impact of future members. Therefore, the results of this test do not necessarily indicate whether or not the fund will actually run out of money, the financial condition of the System, or the System's ability to make benefit payments in future years.

**(c): Long-term rate of return.** The long-term expected rate of return on pension plan investments is reviewed as part of the experience study. Several factors are considered in evaluating the long-term rate of return assumption, including long-term historical data, estimates inherent in current market data, and an analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation), along with estimates of variability and correlations for each asset class, were developed by the System's investment consultant. These ranges were combined to develop the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The capital market assumptions developed by investment consultants are often intended for use over a 10-year investment horizon and are not always useful in setting the long-term rate of return for funding pension plans which covers a longer timeframe. The long-term rate of return assumption is intended to be a long-term assumption (30 to 50 years) and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years.

**(d): Municipal bond rate.** A municipal bond rate was not used in determining the discount rate. If it were required, the rate would be 3.94% on the Measurement Date.

**(e): Period of projected benefit payments.** Projected future benefit payments for all current plan members until benefit payments ran out.

**(f): Assumed asset allocation.** The target asset allocation and best estimates of arithmetic real rates of return for each major asset class, as used in the June 30, 2022 experience study, are summarized in the following table:

## SECTION IV – NOTES TO FINANCIAL STATEMENTS

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return*
US Large Cap Equity	34.0%	5.10%
US Small Cap Equity	6.0%	5.00%
Global Equity ex-US	28.0%	8.20%
Core Fixed Income	25.0%	1.90%
Long Term Treasuries	3.5%	2.10%
US TIPS	<u>3.5%</u>	1.80%
Total	100.0%	

\*Arithmetic mean

**(g): Sensitivity analysis.** This paragraph requires disclosure of the sensitivity of the NPL to changes in the discount rate. The following presents the NPL of the System, calculated using the discount rate of 6.50 percent, as well as the System's NPL calculated using a discount rate that is 1-percentage-point lower (5.50 percent) or 1-percentage-point higher (7.50 percent) than the current rate:

	1% Decrease (5.50%)	Current Discount Rate (6.50%)	1% Increase (7.50%)
Total Pension Liability	\$425,359,725	\$387,513,477	\$354,944,876
Fiduciary Net Position	<u>409,923,456</u>	<u>409,923,456</u>	<u>409,923,456</u>
Net Pension Liability/(Asset)	\$15,436,269	(\$22,409,979)	(\$54,978,580)

**Paragraph 43:** The required information will be supplied by the System.

## SECTION IV – NOTES TO FINANCIAL STATEMENTS

**Paragraph 44:** This paragraph requires a schedule of changes in Net Pension Liability (Asset). The needed information is provided in the table below for fiscal year ended June 30:

Uniform Retirement System for Justices and Judges			
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a) – (b)
Balances at June 30, 2023	\$377,612,049	\$376,681,341	\$930,708
Changes for the year:			
Service cost	10,977,141		10,977,141
Interest	23,733,497		23,733,497
Benefit changes	0		0
Difference between expected and actual experience	552,686		552,686
Changes in assumptions	0		0
Contributions - employer		8,394,633	(8,394,633)
Contributions - non-employer		0	0
Contributions - member		3,133,763	(3,133,763)
Net investment income		47,317,509	(47,317,509)
Benefit payments, including refunds of employee contributions	(25,361,896)	(25,361,896)	0
Administrative expense		(241,894)	241,894
Other changes		0	0
Net changes	<u>9,901,428</u>	<u>33,242,115</u>	<u>(23,340,687)</u>
Balances at June 30, 2024	\$387,513,477	\$409,923,456	(\$22,409,979)

## SECTION IV – NOTES TO FINANCIAL STATEMENTS

---

### Paragraph 45:

**(a):** The Measurement Date of the collective NPL is June 30, 2024. The TPL as of June 30, 2024 was determined based on the annual actuarial funding valuation report prepared as of July 1, 2024.

**(b):** There is no special funding situation.

**(c):** There was no change in the actuarial assumptions or other inputs that affected the measurement of the TPL since the Prior Measurement Date.

**(d):** There was no change in the benefit terms that affected measurement of the TPL since the Prior Measurement Date.

**(e):** This information will be supplied by the System.

**(f):** The information will be supplied by the System and employer.

**(g):** Please see Section III for the development of the PE.

**(h):** Since certain expense items are recognized over closed periods each year, the deferred portions of these items must be tracked annually. If the amounts serve to reduce PE, they are labeled Deferred Inflows of Resources. If they will increase PE, they are labeled Deferred Outflows of Resources. The recognition of these amounts is accomplished on a level dollar basis, with no interest included in the deferred amounts. Experience gains/losses and the impact of changes in actuarial assumptions, if any, are recognized over the average expected remaining service life of the active and inactive System members at the beginning of the measurement period. Investment gains and losses are recognized equally over a five-year period.

## SECTION IV – NOTES TO FINANCIAL STATEMENTS

The following tables provide a summary of the amounts of the Deferred Outflows of Resources and Deferred Inflows of Resources as of the Measurement Date (June 30, 2024). Per GASB 68, reporting of the differences between projected and actual earnings should be on a net basis, with only one Deferred Outflow or Inflow. This information is provided in the following table.

	Deferred Outflows of Resources	Deferred Inflows of Resources	Net Deferred Outflows/(Inflows) of Resources
Differences between expected and actual experience	\$5,136,516	\$0	\$5,136,516
Changes of assumptions	7,289,457	0	7,289,457
Differences between projected and actual earnings	<u>35,841,660</u>	<u>41,395,267</u>	<u>(5,553,607)</u>
Total	\$48,267,633	\$41,395,267	\$6,872,366

## SECTION IV – NOTES TO FINANCIAL STATEMENTS

The following tables show the Deferred Outflows of Resources and the Deferred Inflows of Resources separately to provide additional detail.

Uniform Retirement System for Justices and Judges - Deferred Outflows of Resources				
	June 30, 2023	Additions	Recognition	June 30, 2024
Differences between expected and actual experience				
FY 2020 Base	\$ 0	\$ 0	\$ 0	\$ 0

FY 2024 Base	0	0	0	0
Total	\$ 0	\$ 0	\$ 0	\$ 0
Differences between projected and actual earnings				
FY 2020 Base	\$ 0	\$ 0	\$ 0	\$ 0
FY 2021 Base	28,922,001	0	14,461,001	14,461,000
FY 2022 Base	0	0	0	0
FY 2023 Base	11,076,653	0	2,769,163	8,307,490
FY 2024 Base	0	23,283,471	4,656,694	18,626,777
Total	\$ 39,998,654	\$ 23,283,471	\$ 21,886,858	\$ 41,395,267
Total	\$ 40,080,681	\$ 23,283,471	\$ 21,968,885	\$ 41,395,267

(i): Collective amounts reported as Deferred Outflows of Resources and Deferred Inflows of Resources related to pensions will be recognized in PE in future years as follows:

Year Ended June 30:	Deferred Outflows of Resources	Deferred Inflows of Resources	Net Deferred Outflows/(Inflows) of Resources
2025	\$23,802,747	\$21,886,857	\$1,915,890
2026	23,315,408	7,425,857	15,889,551
2027	1,103,844	7,425,858	(6,322,014)
2028	45,634	4,656,695	(4,611,061)
2029	0	0	0
Thereafter	0	0	0

(j): This will be provided by the System.

## SECTION V – REQUIRED SUPPLEMENTARY INFORMATION

There are several tables of Required Supplementary Information (RSI) that need to be included in the System's financial statements:

**Paragraphs 46(a) - (c):** The required tables of schedules are provided in Appendix A.

**Paragraph 47:** Significant methods and assumptions used in calculating the actuarially determined contributions, if any, should be presented as notes to the schedule required by paragraph 46(c). In addition, for each of the schedules required by paragraph 46, information should be presented about factors that significantly affect trends in the amounts reported.

**Changes of benefit terms:** The following changes to the plan provisions were made by the Oklahoma Legislature and reflected in the valuation performed as of July 1 listed below:

2020: House Bill 3350 provided a one-time benefit increase as of July 1, 2020. Members who retired on or prior to July 1, 2015 received a 4.0% benefit increase. Members who retired between July 1, 2015 and July 1, 2018 received a 2.0% benefit increase. Members who retired after July 1, 2018 did not receive a benefit increase.

2018: House Bill 1340, enacted in 2018, provided a stipend for members of each system who had been retired for five years as of October 1, 2018. The stipend amount was based on the funding level of the system. URSJJ members received the lesser of 2% of the gross annual retirement amount or \$1,400. The bill also provided a minimum payment of \$350 for members with 20 years of service. The effective date of the stipend was October 1, 2018.

### **Changes in actuarial assumptions:**

7/1/2023 valuation:

- Change mortality assumption to reflect recent mortality experience.

7/1/2020 valuation:

- Decrease the investment return from 7.00% to 6.50%.
- Decrease the price inflation from 2.75% to 2.50%.
- Decrease the salary scale assumption from 3.75% to 3.50%.
- Decrease the payroll growth from 3.50% to 3.25%.
- Change mortality assumption to reflect recent mortality experience.

## SECTION V – REQUIRED SUPPLEMENTARY INFORMATION

---

7/1/2017 valuation:

- Decrease the investment return from 7.25% to 7.00%.
- Decrease the price inflation from 3.00% to 2.75%.
- Decrease the real wage growth from 1.00% to 0.75%.
- Change mortality assumption to reflect recent mortality improvements.
- Salary scale assumption was decreased from 5.00% to 3.75%
- Retirement rates were revised.

7/1/2016 valuation:

- Decrease the investment return from 7.50% to 7.25%.

## SECTION V – REQUIRED SUPPLEMENTARY INFORMATION

***Method and assumptions used in calculations of actuarially determined contributions.***

The System is funded with fixed contribution rates for the employees and the state. The Actuarially Determined Contributions in the *Schedule of Employer Contributions* are calculated as of the beginning of the fiscal year in which contributions are reported.

The following actuarial methods and assumptions (from the July 1, 2023 actuarial valuation) were used to determine the Actuarially Determined Contribution reported for Fiscal Year End 2024 in that schedule:

Actuarial cost method	Entry age normal
Amortization method	Level percentage of payroll, closed
Amortization period	15 years for each new experience base
	Legacy UAAL (as of July 1, 2021) amortized over remaining 4-year period as of July 1, 2023
Asset valuation method	5-year smoothed market
Price Inflation	2.50 percent
Salary increase, including price inflation	3.50 percent
Long-term Rate of Return, net of investment expense, including price inflation	6.50 percent

Please see the information presented earlier in regard to Paragraph 47 for detailed information on the benefit changes and assumption changes that may have impacted the Actuarially Determined Contributions shown in the *Schedule of Employer Contributions*.

It should be noted that the funding valuation develops a combined pension and OPEB rate.

Note: 2017 was the first year to exclude the Medical Supplement.

## APPENDIX B – SUMMARY OF MAIN BENEFIT PROVISIONS

Following is a summary of the major System provisions used to determine the System’s financial position as of July 1, 2024. For purposes of this report, the post-retirement medical benefit is excluded for liabilities. The full benefit provisions are included because they are relevant for assumptions and funding provisions.

<b>Effective date and authority</b>	<p>The System became effective January 13, 1969.</p> <p>The System is provided for under Sections 1101-1111 of Title 20 of the Oklahoma Statutes.</p>
<b>Administration</b>	<p>The State Judicial Retirement Fund is administered by the Board of Trustees of the Oklahoma Public Employees Retirement System. The Board acts as the fiduciary for investment and administration of the System.</p>
<b>Employees included</b>	<p>All justices and judges of the Supreme Court, Court of Criminal Appeals, Workers Compensation Court, Court of Appeals or District Court who serve in the State of Oklahoma participate in the Uniform Retirement System for Justices and Judges.</p>
<b>Member contributions</b>	<p>Before September 1, 2005, basic member contributions equal 5% of salary, while married members could have elected an 8% contribution rate in order to provide survivor coverage. After September 1, 2005, the member contribution rate for all members is 8% of salary.</p>
<b>Employer contributions</b>	<p>Before July 1, 1997, the fund received an amount equal to 10% of the Court Fund receipts. After July 1, 1997, employer contributions were based on members’ salaries and a yearly schedule and, effective January 1, 2001, were changed to 2.0% of the member’s salary. Effective for the fiscal year ending June 30, 2006, employer contributions increased to 3.0% of the member’s salary and increased annually up to 22.0% for fiscal years ending June 30, 2019, and thereafter.</p>
<b>Service considered</b>	<p>Any justice or judge who becomes a member of the System when first eligible will receive credit for all years of service with the Supreme Court, Court of Criminal Appeals, Workers’ Compensation Court, Court of Appeals, or a District Court of the State of Oklahoma.</p>

# APPENDIX B – SUMMARY OF MAIN BENEFIT PROVISIONS

<b>Compensation considered</b>	Salary received by the justice or judge while serving in the referenced courts.
<b>Final average salary</b>	The average monthly salary received during the thirty-six (36) highest months of active service as a justice or judge.
<b>Eligibility for benefits</b>	A justice or judge must complete eight (8) years of service to be eligible for any benefit from the System. A member who leaves the System, for any reason, prior to the completion of eight (8) years of service is entitled only to a return of his/her accumulated contributions without interest.
<b>Normal retirement date</b>	A member who completes eight (8) years of service and attains age sixty-five (65), or completes ten (10) years of service and attains age sixty (60), or completes eight (8) years of service and whose sum of years of service and age equals or exceeds eighty (80), may begin receiving retirement benefits at his/her request. For judges taking office after January 1, 2012, retirement age is sixty-seven (67) with eight (8) years of service or age sixty-two (62) with ten (10) years of service.
<b>Normal retirement benefit</b>	The benefit, payable monthly for the life of the member, is equal to 4% of average monthly salary multiplied by the number of years in service. In no event, however, will the benefit exceed 100% of final average salary.
<b>Disability retirement</b>	A member who completes fifteen (15) years of service, attains age fifty-five (55), and is ordered to retire by reason of disability is eligible for disability retirement benefits. The benefit, payable for life, is calculated in the same manner as a normal retirement benefit.
<b>Survivor coverage</b>	The spouse of a deceased active member who had met normal or vested retirement provisions may elect a spouse's benefit. The spouse's benefit is the benefit that would have been paid if the member had retired and elected the reduced benefit with the Joint and 100% Survivor option (Option B), or a 50% unreduced benefit for certain married participants making 8% of pay contributions prior to September 1, 2005. Spouses of members who made the voluntary contributions prior to July 1, 1999 and die or retire after July 1, 1999 may

## APPENDIX B – SUMMARY OF MAIN BENEFIT PROVISIONS

### Survivor coverage (cont.)

receive up to 65% of the unreduced benefit. If the member has ten (10) years of service and the death is determined to be employment related, this benefit is payable immediately to the spouse. Otherwise, the benefit is payable to the spouse on the date the deceased member would have been eligible. This benefit is payable only to the surviving spouse of a member and they must be married ninety (90) days prior to the member's termination of employment as a justice or judge.

### Optional forms of retirement benefits

The Maximum Benefit is an unreduced single-life annuity with a guaranteed refund of the contribution accumulation. Three (3) other types of benefit payments are available to retiring members:

Option A – A reduced benefit with Joint and 50% Survivor annuity and a return to the unreduced amount if the joint annuitant dies.

Option B – A reduced benefit with Joint and 100% Survivor annuity and a return to the unreduced amount if the joint annuitant dies.

Original Surviving Spouse Plan – An unreduced benefit with Joint and 50% Survivor annuity available only to members who made additional voluntary survivor benefit contributions of 3% of salary prior to September 1, 2005. Spouses of members who made the voluntary contributions prior to July 1, 1999 and die or retire after July 1, 1999 may receive up to 65% of the unreduced benefit.

For married members, spousal consent is required for any option other than Option A, or a joint annuitant other than the spouse.

### Post-retirement death benefit

Upon the death of any retired member, a \$5,000 lump-sum death benefit will be paid to the member's beneficiary. If there is no beneficiary, then the benefit will be paid to the estate.

## APPENDIX B – SUMMARY OF MAIN BENEFIT PROVISIONS

---

### **Minimum benefits**

In no event will a member, or the estate of a member receive an amount or amounts less than the member's accumulated contributions without interest.

If a former member is not eligible for any other benefit from the System, the member will receive a transfer of these contributions. Similarly, if a member dies while having no spousal coverage, or upon the death of a spouse receiving survivor benefits, the member's beneficiary will receive the excess of the accumulated contributions over all benefits received by either the member, or the member and the spouse combined.

**Supplemental medical insurance** The System contributes the lesser of \$105 per month or the Medicare Supplement Premium to the Office of Management and Enterprise Services, Employees Group Insurance Division for members receiving retirement benefits.

**Expenses** The expenses of administering the System are paid from the Retirement Trust Fund.

# APPENDIX C – STATEMENT OF ACTUARIAL ASSUMPTIONS

## Economic Assumptions

Price Inflation:	2.50% per annum, compounded annually
Long-Term Rate of Return:	6.50% net of investment expenses per annum, compounded annually
Salary Increases:	3.50% per year
Payroll Growth:	3.25% per year
Ad hoc Benefit Increase Assumption:	
Monthly benefits	No increases assumed
Medical supplement	No increases assumed
Projection of 401(a)(17) compensation limit:	Projected with inflation at 2.50%

## Demographic Assumptions

Retirement Age:		Annual Rates of Retirement Per 100 Eligible Members
	<u>Attained Age</u>	
	Below 59	5
	59 – 61	10
	62 – 66	15
	67 – 68	20
	69 – 74	25
	75+	100
Deferred vested members	Participants with deferred benefits are assumed to commence benefits on a date provided by the System. Actives expected to terminate with a vested benefit are assumed to commence benefits at their earliest eligible retirement date.	
Mortality Rates:		
Active participants and non-disabled pensioners	Pub-2010 Below Median, General Membership Active/Retiree Healthy Mortality Table with base rates projected generationally using Scale MP-2019. Male rates are set back two years, and female rates are unadjusted.	

## APPENDIX C – STATEMENT OF ACTUARIAL ASSUMPTIONS

Disabled pensioners	Nondisabled retiree mortality set forward 12 years for disabled experience.
<b>Separation Rates:</b>	
Separation for all reasons other than death	2% for all years of service prior to retirement eligibility.
<b>Disability Rates:</b>	0%
<b>Marital Status:</b>	
Percentage married	85%
Age difference	Males are assumed to be four (4) years older than spouses.
<b>Other Assumptions:</b>	
Provisions for expenses	Administrative expenses, as budgeted for the Oklahoma Uniform Retirement System for Justices and Judges.
Form of payment	Active members who were contributing 8% of pay as of August 31, 2005, are assumed to retire with an unreduced benefit payable as a 50% Joint and Survivor annuity. All other members are assumed to retire with a life-only annuity.
Age	For members who have not completed the application process and are missing a date of birth, we assume they are 50 years old as of the valuation date.
Service	For members who have not completed the application process and are missing an entry date, we assume they have half a year of service as of the valuation date.
